Improving Schools from the Bottom Up Patrick M. Shields, 1995 This document presents findings of a national study of effective schools programs and other school-based reforms conducted during school year 1991-92 The reforms were broadly defined to encompass school site improvement efforts designed to develop schoolwide capacity for problem solving to improve teaching and to increase student learning Data were obtained from a survey of a nationally representative sample of local school districts n = 1,555 surveys of administrators in all state education agencies and intensive case studies of 5 states 16 districts and 32 schools Data from the district survey show that school-based reform was relatively widespread occurring at all school levels The case study data suggest that change efforts varied widely across districts and schools The study examined the degree to which the reform effort involved meaningful collaboration among school staff staff ownership of the change process a focus on teaching and curriculum building professional capacity among staff and a focus on student outcomes and equity The case study data suggest that the more promising examples of school-based reform often shared a set of characteristics a clear focus on creating more challenging learning experiences for all students a school culture in which teachers worked collaboratively
