Scientific Lectures and Essays Charles

Kingsley, 1880 Novel Science Adelene Buckland, 2013-04-12 Novel Science is the first in depth study of the shocking groundbreaking and sometimes beautiful writings of the gentlemen of the heroic age of geology and of the contribution these men made to the literary culture of their day For these men literature was an essential part of the practice of science itself as important to their efforts as mapmaking fieldwork and observation The reading and writing of imaginative literatures helped them to discover imagine debate and give shape and meaning to millions of years of previously undiscovered earth history Borrowing from the historical fictions of Walter Scott and the poetry of Lord Byron they invented geology as a science discovered many of the creatures we now call the dinosaurs and were the first to unravel and map the sequence and structure of stratified rock As Adelene Buckland shows they did this by rejecting the grand narratives of older theories of the earth or of biblical cosmogony theirs would be a humble science faithfully recording minute details and leaving the big picture for future generations to paint Buckland also reveals how these scientists just as they had drawn inspiration from their literary predecessors gave Victorian realist novelists such as George Eliot Charles Kingsley and Charles Dickens a powerful language with which to create dark and disturbing ruptures in the too seductive sweep of story **Year-book of Nature and Popular Science for ...** John Christopher Draper, 1873 **The Timberman**, 1925 **Works** Charles
