

Carbon Monoxide Detector Manual (SSCO1)

Introduction

The SSCO1 wireless carbon monoxide (CO) detector monitors the level of CO gas in your home and gives early warning when a potentially dangerous level exists. It does not detect fire, smoke or any other gas. If a dangerous concentration of CO is detected, the signal on the front of the detector goes on and an internal alarm sounds. After a longer following is issued, the built-in warning transmission can give others (not SimpliSafe Alarm System users) around the area automatically using either CO or a longer beeped.

The CO detector also monitors low battery, and correct, and sensor end of life conditions. These trouble conditions will cause an audible ring from the CO detector as described in the "Operating Modes" section below.

The SSCO1 is intended for residential indoor applications and other areas approved by the authority having jurisdiction (AHC). It is not intended for use in industrial applications.

CO detectors should be installed in or near bedrooms and living areas. Make sure you can hear the alarm from all sleeping areas.
