medicalize the illness experience for patients this text delves into palliative care beyond the specific diseases affecting the  
patient Instead content focuses on the whole person and family Palliative patients struggle with chronic debilitating and  
painful conditions and grapple with the fact that life as they knew it has already passed away Families and friends  
reciprocally suffer not knowing how to help and therefore become the secondary victims of the disease This is not the  
challenge of a lone nurse or a single physician therapist or social worker Rather palliative and hospice care requires the  
expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience continue to  
find meaning and purpose in life and cure what can be cured Palliative Care Nursing Fifth Edition delivers advanced  
empirical aesthetic ethical and personal knowledge This new edition brings an increased focus on outcomes benchmarking  
progress and goals of care It expounds upon the importance of the cross disciplinary collaboration introduced in the previous  
edition Every chapter in Sections I II and III includes content written by a non nursing member of the interprofessional team  
Based on best evidence and clinical practice guidelines this text presents comprehensive targeted interventions responsive to  
the needs of palliative and hospice patients and family Each chapter contains compassionate timely appropriate and cost  
effective care for diverse populations across the illness trajectory Key Features The expanded new edition offers current
