## **Challenging Religious Studies:**

Challenging Religious Studies John Atherton, 2014-10-30 This book represents a breakthrough in our understanding and development of the practices ethics and theories of religious studies through engagement with the world of daily life and its breath taking transformation since 1800 as revealed particularly in living standards life expectancy and subjective wellbeing Together with the equally disturbing growth of inequalities between and within nations this constitutes the profound paradox of development What is of particular interest is the book s rigorous treatment of the question why religion is better at delivering greater subjective wellbeing and how it does so To build such arguments always involves engaging with key related disciplines experiences and practices including economics psychology sociology and economic history But it will also increasingly offer religion the opportunity to participate in such developments but always and increasingly through collaboration with other such disciplines and experiences and always with the objective of furthering the greater wellbeing of all people in and through their environments *The Challenge of Religious Studies* Kenneth Gordon Howkins, 1972

**Challenging Religious Studies** John Atherton, 2014-10-31 This book represents a breakthrough in our understanding and development of the practices ethics and theories of religious studies through engagement with the world of daily life and its breath taking transformation since 1800 as revealed particularly in living standards life expectancy and subjective wellbeing **Religion in the 21st Century** Margit Warburg, Dr Lisbet Christoffersen, Professor Hanne Petersen, Professor Hans Raun Iversen, 2013-06-28 In spite of the debate about secularization or de secularization the existential bodily need for religion is basically the same as always What have been changed are the horizons within which religions are interpreted and the relationships within which religions are integrated This book explores how religions continue to challenge secular democracy and science and how religions are themselves being challenged by secular values and practices All traditions whether religious or secular experience a struggle over authority and this struggle seems to intensify with globalization as it has brought people around the world in closer contact with each other In this book internationally leading scholars from sociology law political science religious studies theology and the religion and science debate take stock of the current interdisciplinary research on religion and open new perspectives at the cutting edge of the debate on religion in the 21st century **Religion in the 21st Century** Lisbet Christoffersen, 2010 Religion in the 21st century is a phenomenon that cannot be taken for granted and is undergoing transformations that present us with new challenges both from a scholarly and societal perspective The nuanced and multifaceted way in which these features are analyzed in this book should be welcomed by all who are interested and concerned with the role of religion on the contemporary scene The combination of accessible scholarship and challenging positions makes this a book for everyone who is interested in religion in the secularized parts of the world The volume contributes to an understanding of how it is not after all a contradiction to be both fully modern and religious Jan Olav Henriksen Norwegian School of Theology Oslo Norway

**Challenges for Religious**

**Education** Richard Pring, 2019-11-19 Major social changes especially as a result the more multicultural nature of society have raised important issues about the teaching of religion and the rational basis of different religious faiths Challenges for Religious Education addresses and critically examines these changes and asks where religious education and Faith Schools fit within secular society and indeed whether there is still a place for them at all Analysing what religious education could look like if it were considered from a wider world views perspective that doesn't focus on a particular set of religious beliefs this book considers the reasonableness of holding a faith and therefore in teaching it the ongoing tensions between faith and reason arguments for and against the study of religious education whether modern secular thought is itself an ideology and the philosophical standpoints on the relationship between faith and reason Linking faith and reason with the issue of whether religious education is truly necessary in a modern world Challenges for Religious Education is a crucial read for anyone interested in the future of religious education teaching in a secular society *The Challenge of Religious Studies* Kenneth G. Howkins, 1995-05-01

**The Modern Challenge to Religious Education** Gerald Emmett Carter, 1961 **Education, Religion and Diversity** L. Philip Barnes, 2014-02-05 In this thoughtful and provocative book Philip Barnes challenges religious educators to re think their field and proposes a new post liberal model of religious education to help them do so His model both confronts prejudice and intolerance and also allows the voices of different religions to be heard and critically explored While Education Religion and Diversity is directed to a British audience the issues it raises and the alternative it proposes are important for those educators in the United States who believe that the public schools have an important role in teaching students about religion Walter Feinberg Professor Emeritus of Education Policy Organization and Leadership at the University of Illinois Urbana Champaign Philip Barnes offers a penetrating and lucid analysis of the strengths and weaknesses of modern religious education in Britain He considers a range of epistemological and methodological issues and identifies two contrasting models of religious education that have been influential what he calls a liberal and a postmodern model After a detailed review and criticism of both he outlines his own new post liberal model of religious education one that is compatible with both confessional and non confessional forms of religious education yet takes religious diversity and religious truth claims seriously Essential reading for all religious educators and those concerned with the role of religion in schools Bernd Schröder Professor of Practical Theology and Religious Education University of Göttingen What place if any does religious education have in the schools of an increasingly diverse society This lucid and authoritative book makes an incisive contribution to this crucial debate Roger Trigg is Emeritus Professor of Philosophy University of Warwick and Senior Research Fellow Ian Ramsey Centre Oxford The challenge of diversity is central to education in modern liberal democratic states and religious education is often the point where these differences become both most acute and where it is believed of all curriculum subjects resolutions are most likely to be found Education Religion and Diversity identifies and explores the commitments and convictions that have guided post confessional religious education and concludes controversially that the

subject as currently theorised and practised is incapable of challenging religious intolerance and of developing respectful relationships between people from different communities and groups within society It is argued that despite the rhetoric of success which religious education is obliged to rehearse in order to perpetuate its status in the curriculum and to ensure political support a fundamentally new model of religious education is required to meet the challenge of diversity to education and to society A new framework for religious education is developed which offers the potential for the subject to make a genuine contribution to the creation of a responsible respectful society Education Religion and Diversity is a wide ranging provocative exploration of religious education in modern liberal democracies It is essential reading for those concerned with the role of religion in education and for religious and theological educators who want to think critically about the aims and character of religious education

*Religious Studies* Walter H. Capps, 1995 Since its inception almost 200 years ago the study of religion has informed enlightened provoked and challenged our notions of humanity's deepest beliefs and longings Now Walter Capps nationally recognized for the quality and depth of his teaching has written the first full scale introduction to the history and methods of religious studies To assess the many points of view in this mature but diffuse discipline Capps uses the idea that four basic of fundamental questions and three enduring interests have given formal structure to the study of religion the essence of religion the origin of religion descriptions of religion the function of religion the language of religion comparisons of religion and the future of religious studies In this way Capps relates the chief insights and theories of philosophy anthropology phenomenology sociology and theology of religion and spotlights theorists from Immanuel Kant to Mircea Eliade His valuable text unites in a single narrative and conceptual framework the major methodological proposals for the academic study of religion treats all the major theorists in their respective disciplines schools of thought and intellectual movements treats the whole discipline as a dynamic and evolving tradition Religious Studies constitutes not only an erudite introduction to the field exhibiting vast scholarship and careful assessment but also a bold synthetic proposal for its future
