Discipline in the Secondary Classroom Randall S. Sprick, 2013-03-05 A teacher's success throughout the school year is largely determined by the events of the first few weeks of school. In his highly successful book *Discipline in the Secondary Classroom*, more than 100,000 copies sold, classroom management guru Randall Sprick offers practical strategies for beginning the school year, organizing the classroom for success, and establishing rules and behavior expectations for students. He also provides scores of helpful tips gathered from successful classroom teachers or gleaned from the latest educational research. *Discipline in the Secondary Classroom* is a treasure trove of practical advice, tips, checklists, reproducible posters, and ready-to-use activities that will save teachers time and help them become more effective educators. Both new and seasoned teachers will find this book invaluable for designing a management plan that prevents problems, motivates students, and teaches them to behave responsibly. *Discipline in the Secondary Classroom* includes nine chapters that cover everything from creating a vision for classroom behavior to modifying a student behavior plan as the school year progresses. Also included is a DVD featuring Dr. Sprick teaching two core topics from within the book: How to finalize your classroom management plan and communicate it to students; How to reinforce positive behavior in students rather than react to negative behavior.

Integrated Management of Systems, Services, Processes and People in IT Claudio Bartolini, Luciano Paschoal Gaspary, 2009-10-15 This volume of the Lecture Notes in Computer Science series contains all papers accepted for presentation at the 20th IFIP IEEE International Workshop on Distributed Systems Operations and Management DSOM 2009, which was held in Venice, Italy, during October 27-28, 2009. DSOM 2009 was the 20th event in a series of annual workshops. It followed in the footsteps of previous successful meetings, the most recent of which were held in Samos, Greece (DSOM 2008), San Jose, California, USA (DSOM 2007), Dublin, Ireland (DSOM 2006), Barcelona, Spain (DSOM 2005), and Davis, California, USA (DSOM 2004). The goal of the DSOM workshops is to bring together researchers from industry and academia working in the areas of networks, systems, and service management to discuss recent advances and foster future growth. In contrast to the larger management conferences such as the International Symposium on Integrated Network Management and NOMS (Network Operations and Management Symposium), DSOM workshops have a single-track program in order to stimulate more intense interaction among participants.
