

Chapter 10: Circles

Exercise 10.2 (Page 173 of Grade 9 NCERT Textbook)

Q1. Recall that two circles are congruent if they have the same radii. Prove that equal chords of congruent circles subtend equal angles at their centers.

Difficulty level:

Easy

Known/given:

Two circles are congruent if they have same radii.

To prove:

Equal chords of congruent circles subtend equal angles at their centers.

Reasoning:

Using chords are equal and the fact that circles are congruent, we prove the statement using Side-Side-Side (SSS criteria) and Corresponding parts of congruent triangles (CPCT).

Solution:

Let QR and YZ be the equal chords of 2 congruent circles.

$$QR = YZ$$

We need to prove that they subtend equal angles at centre, i.e. $\angle QPR = \angle YXZ$

We know that the radii of both the circles are equal. So we get:

$$PR = PQ = XZ = XY$$
