62 Projects to Make with a Dead Computer Randy Sarafan, 2010-02-11. Computer hacking takes on a whole new meaning when you're going at it with a screwdriver and hammer, announcing the most wildly inventive, eco-friendly craft book on repurposing everyday objects since *Generation T*. Except in this case the raw material isn't a T-shirt but the stuff we all have lying around and have no idea what to do with or even how to get rid of properly: your old cell phone, a broken printer, irredeemable iPod, busted digital camera, mysterious tangles of cables and wires, orphaned keyboards and, of course, those dead PCs and laptops. Created by a Parsons design graduate who's obsessed with navigating the intersection of art and technology, here are 62 ingenious projects that are irresistibly geek chic. An iMac Terrarium, how cool is that? A laptop Digital Photo Frame. The impressively green Scanner Compost Bin. Plus a power strip Bird Feeder, Walkman Soap Dish, My First Squiggle Bot, Qwerty Hair Tie, Flat screen Ant Farm. Each project has complete step-by-step instructions, is rated by difficulty in a thorough first chapter, the author covers all the tools and skills needed to take apart electronics safely and is arranged by use from stuff for the house to fashion toys, arts and crafts items for pets and more.
