mathematics core curriculum several times over the past decade The latest change was the adoption of the Common Core State Standards introducing both grade level content standards and standards of mathematical practice that emphasize how students are to study and reason with mathematics at all grade levels According to state officials these standards require more mathematical reasoning problem solving and deeper understanding than previous core curriculum documents One way to address this change is for teachers to educate using projects during their instruction as unit starters daily lessons and for evaluation purposes Yet finding instructional materials takes considerable time and effort hence I have gathered analyzed and classified several projects teachers currently use in their classrooms according to the Common Core State Standards and presented them here in this report This report contains five projects that cover different mathematical components of the new core The Invention Project is a statistics lesson comprised of a student survey along with several types of statistical follow up questions that allow students to represent display and interpret data The Dilation project is an application based on dilating a greeting card with a scale factor by using proportions and similar figures The Interior and Exterior Angles Project leads students to find the sum of interior and exterior angles of convex polygons after students have learned the Triangle Sum Theorem The Celebrity Project uses an applet to show lines of best fit and then engages the students in creating their own data of ordered pairs in a scatterplot once the data is obtained students learn the procedure for generating a regression line The Kite Flying Project allows for multiple learning levels as students pursue the Pythagorean Theorem with a hands on approach Materials for project implementation such as student task sheets scoring rubrics and the alignment with Common Core State Standards are included in this report *The State of State Math Standards, 2005* David Klein,2005
