Teaching About Dialect Variations and Language in Secondary English Classrooms Michelle D. Devereaux, 2014-10-17 Standardized tests demand Standard English, but secondary students, grades 6-12, come to school speaking a variety of dialects and languages, thus creating a conflict between students' language of nurture and the expectations of school. The purpose of this text is twofold: to explain and illustrate how language varieties function in the classroom and in students' lives, and to detail linguistically informed instructional strategies. Through anecdotes from the classroom, lesson plans, and accessible narrative, it introduces theory and clearly builds the bridge to daily classroom practices that respect students' language varieties and use those varieties as strengths upon which secondary English teachers can build. The book explains how to teach about language variations and ideologies in the classroom, uses typically taught texts as models for exploring how power, society, and identity interact with language, literature, and students' lives, connects the Common Core State Standards to the concepts presented, and offers strategies to teach the sense and structure of Standard English and other language variations so that all students may add Standard English to their linguistic toolboxes.

Teaching the Tough Issues Jacqueline Darwin, 2015 *Teaching the Tough Issues* introduces a groundbreaking teaching method intended to help English, social studies, and humanities teachers address difficult or controversial topics in their secondary classrooms. Because these issues are rarely addressed in teacher preparation programs, few teachers feel confident

facilitating conversations around culturally and politically sensitive issues in ways that honor their diverse students voices and lead to critical transformative thinking The author describes a four step method to help teachers structure discussions and written assignments while concurrently assisting them in addressing Common Core State Standards Designed to aid students in both developing their own viewpoints on contentious issues and in actively critiquing those of their teachers and peers these practices will enhance any humanities curriculum Book Features Offers guidance for exploring difficult and or controversial aspects of course content Provides an excellent means of differentiating instruction and promoting critical literacy Helps teachers to foster positive behavior and decision making with their students Enables students to improve their reading writing speaking listening and observation skills Assists teachers in attaining the CCSS and other curricular mandates in their secondary humanities classrooms Darwin has provided us all with a powerful tool for guiding students as they explore their identity unafraid to explore what it means to be human From the Foreword by Douglas Fisher professor of educational leadership San Diego State University Darwin takes on the big important issues in adolescents lives that often go unaddressed in most classrooms With an equal balance of sensitivity and directness she exhorts teachers to name deconstruct and think curricularly about the cultural and political forces influencing and being influenced by today s youth William Brozo professor of literacy George Mason University author of Wham Teaching with Graphic Novels Across the Curriculum Trailblazers for Whole School Sustainability Jennifer Seydel,Cynthia L.
