**Robert Smith, John Scott Moore**

## **Commons And Borderlands:**

**Commons and Borderlands** Marilyn Strathern, 2004 A leading social anthropologist examines early 21st century interests in interdisciplinarity with particular attention to the conjunction of science and society Archaeology **Routledge**

**Handbook of Food as a Commons** Jose Luis Vivero-Pol, Tomaso Ferrando, Olivier De Schutter, Ugo Mattei, 2018-12-17 From the scientific and industrial revolution to the present day food an essential element of life has been progressively transformed into a private transnational mono dimensional commodity of mass consumption for a global market But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective Chapters do not define the notion of commons but engage with different schools of thought the economic approach based on rivalry and excludability the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South the legal approach that describes three types of proprietary regimes private public and collective and different layers of entitlement bundles of rights and the radical activist approach that considers the commons as the most subversive coherent and history rooted alternative to the dominant neoliberal narrative These schools have different and rather diverging epistemologies vocabularies ideological stances and policy proposals to deal with the construction of food systems their governance the distributive implications and the socio ecological impact on Nature and Society The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings

Housing as Commons Stavros Stavrides, Penny Travlou, 2022-07-14 Experiences of the struggle for housing ignited by the lack of social and affordable housing have led to the establishing of shared and self managed housing areas In such a context it becomes crucially important to re think the need to define common urban worlds from below Here Penny Travlou and Stavros Stavridis trace contemporary practices of urban commoning through which people re define housing economies Connecting to a rich literature on the importance of commons and of practices of commoning for the creation of emancipated societies the authors discuss whether housing struggles and co habitation experiences may contribute in crucial ways to the development of a commoning culture The authors explore a variety of urban contexts through global case studies from across the Global North and South in search of concrete examples that

illustrate the potentialities of urban commoning      *Educational Commons in Theory and Practice* Alexander J. Means, Derek R. Ford, Graham B. Slater, 2017-02-27 In this volume critical scholars and educational activists explore the intricate dynamics between the enclosure of global commons and radical visions of a common social future that breaks through the logics of privatization ecological degradation and dehumanizing social hierarchies in education In its institutional and informal configurations alike education has been identified as perhaps the key stake in this struggle Insisting on the urgency of an education that breaks free of the bonds of enclosure the essays included in this volume weave together bright threads of radical thought into a vivid tapestry illustrating a critical framework for enacting a global educational commons      *From Capital to Commons* Hannes Gerhardt, 2024-11-12 A Choice Outstanding Academic Title in Economics 2023 In this stimulating analysis Hannes Gerhardt outlines the potentials and challenges of a technology enabled commons focused transition out of capitalism The book shows that openness and cooperation are more beneficial in today's economies and societies than competition and profit seeking Driven by this conviction Gerhardt identifies key imperatives for overcoming capitalism from democratizing our digital material and financial economies to maintaining a robust political mobilization Using clear examples he explores tactical openings through the lens of compeerism a newly constructed framework that highlights the latent counter capitalist possibilities but also limits of our emerging technological landscape This is an accessible contribution to counter capitalist discourse that is both inspiring and pragmatic for academics and activists alike

*Accounts and Papers of the House of Commons* Great Britain. Parliament. House of Commons, 1875      **Mining and Indigenous Lifeworlds in Australia and Papua New Guinea** Alan Rumsey, James F. Weiner, 2004 This volume gives a vital and unique insight into the effects of mining and other forms of resource extraction upon the indigenous peoples of Australia and Papua New Guinea Based on extensive fieldwork it offers a comparative focus on indigenous cosmologies and their articulation or disjunction with the forces of development A central dimension of contrast is that Australia as a settled continent has had wholesale dispossession of Aboriginal land while in Papua New Guinea more than 95% of the land surface remains unalienated from customary ownership Less obviously there are also important similarities owing to a shared form of land title in which the state retains ownership of underground resources the manner in which Western law has been used in both countries to define and codify customary land tenure an emphasis on the reproductive imagery of minerals petroleum and extraction processes employed by Aborigines and Papua New Guineans and some surprising parallels in the ways that social identities on either side of the Arafura Sea have traditionally been grounded in landscape These studies are essential reading for all scholars involved in assessing the effects of resource extraction in Third World and Fourth World settings They contribute penetrating studies of the forms of indigenous socio cultural response to multinational companies and Western forms of governance and law ADVANCE PRAISE The writing is new and interesting The essays mark out new ideas in seemingly effortless abundance In sum buy it read it I think you'll agree that it's one of the really interesting books of the
