

McDonald Soccer Skill Test

In 1951 during his postgraduate study , McDonald constructed the soccer skill test for measuring accurate kicking, ball control and judgement of a moving ball in soccer . The test was constructed on college men and the validity coefficient of the test ranged from 0 . 6 3 to 0 . 9 4 . The author has selected controlled kicking skill as the most fundamental skill element of soccer playing. He conducted the kicking test with a restraining line distance of 9 feet , 15 feet , 21 feet and 30 feet from the kickboard . However , the test with a nine feet retraining distance provided the highest validity coefficient and is in common use for soccer skill testing.
