

MATHCOUNTS®

2015 ■ School Competition ■ Target Round Problems 1 & 2

Name _____

DO NOT BEGIN UNTIL YOU ARE INSTRUCTED TO DO SO.

This section of the competition consists of eight problems, which will be presented in pairs. Work on one pair of problems will be completed and answers will be collected before the next pair is distributed. The time limit for each pair of problems is six minutes. The first pair of problems is on the other side of this sheet. When told to do so, turn the page over and begin working. This round assumes the use of calculators, and calculations also may be done on scratch paper, but no other aids are allowed. All answers must be complete, legible and simplified to lowest terms. Record only final answers in the blanks in the left-hand column of the problem sheets. If you complete the problems before time is called, use the time remaining to check your answers.

Comparative and Dialectal Approaches to Analogy Associate Professor of Morphology and Its Interface with Syntax Xavier Bach, Xavier Bach, Louise Esher, Professor of Romance Linguistics Sascha Gaglia, Sascha Gaglia, 2025-09-30 This volume brings together specialists in inflectional morphology historical linguistics and dialectology to explore the processes directionality models and targets of morphological analogy The chapters draw on atlas data and historical sources as well as experimental and computational methods and present case studies from a range of Romance and Germanic languages Existing work on inferential relationships predictability and complexity has investigated what information speakers can access with respect to the shape of inflectional forms the studies presented here examine how speakers make use of that information and shed light on the properties and contours of inflectional structure The book is divided into three thematic sections that explore respectively the range of objects and patterns that morphological analogy can manipulate the influence of frequency effects on the choice of models and targets in analogical change and the mechanisms of change and how these can be modelled The contributors discuss a variety of significant theoretical issues including the advantages of different models of analogy and inflection constraints on the choice of template for analogy autonomous morphology and non canonical inflection and morphological complexity The historical variationist approaches taken here will complement the considerable existing body of theoretical work in this field and will be of interest to scholars and advanced students working on language change language complexity and word structure

Accountability in education: meeting our commitments UNESCO, 2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those

that are working and those that are not Back cover **Structural Equation Modeling of Multiple Rater Data** Michael Eid, Christian Geiser, Tobias Koch, 2024-09-18 The use of multiple raters can improve the validity of conclusions made on self and other reports of emotions attitudes goals and self perceptions of personality Yet analyzing these ratings requires special psychometric models that take into account the specific nature of these data From leading authorities this book offers the first comprehensive introduction to structural equation modeling SEM of multiple rater data Rather than taking a one size fits all approach the book shows how the choice of a model should be guided by measurement design and purpose Practical recommendations are provided for selecting suitable measurement designs raters and psychometric models Models for different combinations of rater types and for cross sectional as well as longitudinal research designs are described step by step with a strong emphasis on the substantive meaning of the latent variables in the models User friendly features include equation boxes application boxes and a companion website with Mplus and lavaan code for the book s examples
