According to Clarisse, what do her peers talk about?

Clothes, cars, and swimming pools; nothing contentious.

Why does she have an issue with this?

To Clarisse, these topics are shallow and meaningless. She is annoyed by the way nobody disagrees with each other; she values critical thought and the exchange of complex ideas.

Montag sees Clarisse like a daughter.

"You make me feel very old and very much like a father."

Montag starts channeling Clarisse in his thinking.

He opened his mouth and it was Clarisse McClellan saying, "Didn't firemen prevent fires rather than stoke them up and get them going?"

Montag is worried the hound is going to attack him.

"This isn't the first time it's threatened me," said Montag. "Last month it happened twice."

Chapter 3 Mammals Section 3 Answer:

Mammalian Vestibular Physiology V. J. Wilson, 2013-06-29 It is easy to underrate the importance of a sensory system whose receptor is buried deep within the skull and of whose performance we are usually not aware. It is only when it malfunctions that we know we have a vestibular system. Unraveling the mechanisms by which activation of the vestibular labyrinth exerts its varied effects presents a great challenge which increasing numbers of investigators are rushing to meet. At this time a period of transition appears to have been reached. On the one hand physiological and anatomical techniques have provided extensive information about the properties of the receptor and of some of the pathways that link it to the musculature. On the other hand extensive behavioral and psychophysical studies provide different insights into the mechanisms involved in vestibular reflexes. Until recently there has been relatively little interaction between the practitioners of these two widely different approaches. It has been our goal to assess and describe the progress that has been made in both areas and when possible to make a synthesis of the results. As will be seen numerous questions are raised in the process and we hope that they will help in pointing the way to further investigations. We are grateful to the authors and publishers who gave permission to reproduce many of the figures and to our colleagues who have read and commented on all or part of the manuscript. Victor J.
