## You should be able to:

1. Define the following ecological terms: habitat, niche, community, symbiosis, competition, predation, parasitism, and mutualism.
2. List, distinguish among, and provide examples of the several types of species interactions.
3. Discuss the positive aspects and the negative aspects of predation on prey populations.
4. Describe the role competition plays in shaping communities.
5. Describe how communities are organized, how they develop, and how they diversify.
6. Explain how species become "endangered".
7. Be able to distinguish the various aspects of "habitat".
8. Explain the competitive exclusion principle.

## You should know the difference between:

- Weather and climate
- Predation and herbivory
- Habitat and niche
- Mutualism, commensalism, and parasitism.
- Primary and Secondary Succession.
- Major terrestrial biomes

*CEPA Review, the Government Response* Canada, CEPA Office (Canada), 1995 The Canadian Environmental Protection Act CEPA was proclaimed in force in 1988 with the provision that there would be a review of its adequacy within five years. A House of Commons committee undertook such a review in 1994 and tabled its report in 1995. This document is the government response to that report. The introduction sets out the context in which a renewed CEPA is being proposed and discusses the need for a cooperative approach and the importance of integrating environmental considerations into economic decision making. The second part summarizes each chapter of the government response and the third part sets out specific proposals for each chapter along with a brief explanation of the problems these proposals are addressing. There is also reference to current arrangements with other jurisdictions and stakeholders for managing these problems as well as the benefits to the public government partners and stakeholders of proceeding as proposed

**Restoration Ecology** Jelte van Andel, James Aronson, 2012-04-12 Enlarged enhanced and internationalized edition of the first restoration ecology textbook to be published with foreword by Dr Steven Whisnant of Texas A M University and Chair of the Society of Ecological Restoration. Since 2006 when the first edition of this book appeared major advances have taken place in restoration science and in the practice of ecological restoration. Both are now accepted as key components of the increasingly urgent search for sustainability at global national and community levels

hence the phrase New Frontier in the title While the first edition focused on ecosystems and landscapes in Europe this new edition covers biomes and contexts all over the world Several new chapters deal with broad issues such as biological invasions climate change and agricultural land abandonment as they relate to restoration science and ecological restoration Case studies are included from Australia North America and the tropics This is an accessible textbook for senior undergraduate and graduate level students and early career scientists The book also provides a solid scientific background for managers volunteers and mid career professionals involved in the practice of ecological restoration Review of the first edition I suspect that this volume will find its way onto the shelves of many restoration researchers and practitioners and will be used as a key text in graduate courses where it will help fill a large void My own copy is already heavily bookmarked and will be a constant source of research ideas and lecture material Environmental Conservation Companion Website A companion website with downloadable figures is available at [www.wiley.com/go/vanandel/restorationecology](http://www.wiley.com/go/vanandel/restorationecology)
