Background Report on Extending Bank Powers to Include Light Vehicle Leasing DesRosiers Automotive Consultants, Task Force on the Future of the Canadian Financial Services Sector, 1998 This report begins with discussion of the controversy surrounding the desire by banks to enter the light vehicle leasing business. This is followed by a review of the structure of the Canadian automotive sector, the characteristics of two vehicle sales markets (fleet and retail), the types of automotive financing products available (including loans and leases), the players involved in the Canadian automotive finance market, and financing trends in the total vehicle market. Leasing issues (including those related to bank involvement) are then discussed, including regulation of leasing by banks, the economics of leasing versus loans, disclosure issues, end of lease issues, and the advantages and drawbacks of leasing for the automobile sector. The next two chapters present detailed arguments against and for extending bank powers to leasing. Finally, the United States experience with bank leasing is reviewed. Appendices include information on financing trends in the fleet and retail vehicle markets, a summary of the positions of the various stakeholders, and a research report on vehicle lease data in Canada and the US.
