

4. Movement in opening and closing position

	Year 1	Year 2	Year 3
	\$	\$	\$
Closing position	3,500	5,125	5,344
Opening position	Nil	3,500	5,125
Movement	3,500	1,625	219
	↑ Liability	↑ Liability	↑ Liability

Answer to example 5 – Revaluations

There is a gain on revaluation at the year-end of \$330,000 (\$800,000 - \$470,000) that is shown through other comprehensive income.

The deferred tax is calculated in the standard fashion but the carrying value is based upon the revalued amount.

	Year 1
	\$
Carrying value (revalued amount)	800,000
Tax base	420,000
Temporary difference	380,000
Deferred tax position @20%	76,000
	Liability (CV > TB)

The deferred tax liability must be recorded at \$76,000 at the end of the first year but careful consideration must be given to the movement in the deferred tax liability as it is higher than what it is expected to be given the asset was revalued.

DR	Profit or loss (\$)	12,000
	Other comprehensive income	
DR	(\$330,000 gain on revaluation x 20%)	66,000
CR	Deferred tax liability	76,000

Chapter 16**Answer to example 1 – Transaction price**

The three-year interest-free credit period suggests that the \$10,000 selling price includes a significant financing component.

The selling price is therefore discounted to present value based on a discount rate that reflects the credit characteristics of the party (customer) receiving the financing i.e. 5%.

Therefore the transaction price is $\$10,000/(1.05)^3 = \$10,000 \times 0.8638 = \$8,638$.

Answer to example 2 – Allocation of price

The performance obligations and allocation of total price are as follows:

Provision of home cinema system $(9,000/11,000 \times \$10,000) = \$8,182$

Provision of maintenance contract $(2,000/11,000 \times \$10,000) = \$1,818$
