

Chapter 5

Practical Application

*"I hear and I forget; I see and I remember; I do and I understand."*⁵

Confucius

Practical application is the actual hands-on, skill-development part of training. It should follow as soon as possible after instruction. There are three levels of practical application—

- Learning tasks for the first time (initial training).
- Meeting training standards (proficiency training).
- Practicing previously learned training standards (sustainment training).

INITIAL TRAINING

Initial training introduces Marines to a task. The initial stage of practice should follow the presentation, while information is still fresh in a Marine's mind. This way, Marines will begin practice with a clear idea of the task to be performed because the task has just been explained and demonstrated to them.
