

Chapter 1 The Human Body: An Orientation

Most of us are naturally curious about our bodies; we want to know what makes us tick. This curiosity is even seen in infants, who can keep themselves happy for a long time staring at their own hands or pulling their mother's nose. Older children wonder where food goes when they swallow it, and some believe that they will grow a watermelon in their belly if they swallow the seeds. They scream loudly when approached by medical personnel (fearing shots that sting), but they like to play doctor. Adults become upset when their hearts pound, when they have uncontrollable hot flashes, or when they cannot keep their weight down.

Anatomy and physiology, subdivisions of biology, explore many of these topics as they describe how our bodies are put together and how they work.

An Overview of Anatomy and Physiology

- Define *anatomy* and *physiology*.
 - **Anatomy** – the study of the structures and shape of the body and body parts and their relationship to one another
 - **Physiology** – the study of how the body and its parts work or function
- Explain how anatomy and physiology are related.
 - Always related – structure determines function

Levels of Structural Organization

- Name the levels of structural organization that make up the human body and explain how they are related.
 - Atoms – molecules – cells – tissues – organs – organ systems – organisms
 - Each level is more complex than the previous
- Name the organ systems of the body and briefly state the major functions of each system.
 - **Integumentary** – external covering of the body – skin – waterproofs the body, cushions, protects deeper tissues, excretes salts and urea in perspiration to regulate temperature
 - **Skeletal** – bones, cartilage, ligaments, joints – support, framework for skeletal muscles, protection, formation of blood cells, storehouse for minerals
 - **Muscular** – shorten or contract – movements inside and out of the body
 - **Nervous** – brain, spinal cord, nerves, sensory receptors – allow us to respond to stimuli inside and outside the body
 - **Endocrine** – hormones released from glands into the blood to target organs – control body's activities at a slower rate than nervous
 - **Cardiovascular** – heart and blood vessels – carries oxygen, nutrients, hormones, and other stuff, protect from foreign invaders
 - **Lymphatic** – lymphatic vessels, lymph nodes, spleen, tonsils – return fluid leaked from blood vessels to the blood vessels, cleanse the blood and house immune cells
 - **Respiratory** – keep body constantly supplied with oxygen and remove carbon dioxide – gas exchange
 - **Digestive** – break down food and deliver the products to the blood for dispersal to the body cells
 - **Urinary** – removes the nitrogen-containing wastes from the blood and flushes them from the body in urine – A.K.A. excretory system
 - **Reproductive** – produce offspring
- Classify by organ system all organs discussed.
 - See pages 5 – 6
- Identify the organs shown on a diagram or a dissectible torso.
 - See your book and assignments

Hounded Jenny Lindsay, 2024-09-24 The last decade has seen countless cases of women being fired disciplined protested or no platformed for their views on sex and gender Whether high profile celebrities or previously unknown feminists such women's vocal non belief in gender identity as a universal human condition bears a high social cost These houndings are often presented starkly clinically in headlines or fleeting social media moments stripped of the true cost of holding such beliefs But what is the reality behind the headlines and noise What are the true consequences of holding and living with such seemingly now heretical thoughts Hounded charts the often hidden and unspoken harms women face for prioritising and defending sex based language and rights Outlining the often bewildering array of tactics used by opponents against such women as well as the resilience required to refuse to be silenced Lindsay presents a compelling argument for recognition of the individual and

social harms that are being enacted under the auspices of gender identity activism This debut non fiction book by award winning poet and essayist Jenny Lindsay whose own hounding offers a unique perspective is a solid sane witty but also compassionate account about the very human cost of this extraordinary cultural and political schism *NCLEX-RN Content Review Guide* Kaplan Nursing,2019-03-05 Kaplan s NCLEX RN Content Review Guide provides comprehensive review of the essential content you need to ace the NCLEX RN exam The Best Review Covers all the must know content required to pass the NCLEX RN Content is organized in outline format and easy access tables for efficient review Chapters follow the NCLEX s Client Need Categories so you know you have complete content coverage Kaplan s acclaimed Decision Tree and expert strategies help you master critical reasoning Used by thousands of students each year to succeed on the NCLEX RN Expert Guidance Kaplan s expert nursing faculty reviews and updates content annually We invented test prep Kaplan www kaptest com has been helping students for 80 years and our proven strategies have helped legions of students achieve their dreams
