Algebraic Analysis of Social Networks J. Antonio R. Ostoic, 2021-02-17 Presented in a comprehensive manner this book provides a comprehensive foundation in algebraic approaches for the analysis of different types of social networks such as multiple signed and affiliation networks The study of such configurations corresponds to the structural analysis within the social sciences and the methods applied for the analysis are in the areas of abstract algebra combinatorics and graph theory Current research in social networks has moved toward the examination of more realistic but also more complex social relations by which agents or actors are connected in multiple ways Addressing this trend this book offers hands on training of

the algebraic procedures presented along with the computer package multiplex written by the book's author specifically to perform analyses of multiple social networks. An introductory section on both complex networks and for R will feature however the subjects themselves correspond to advanced courses on social network analysis with the specialization on algebraic models and methods.

*A Practical Guide to Real-time Systems Development* Sylvia Goldsmith, 1993. This book covers the fundamentals of structured development from requirements through to implementation and is aimed at anyone who has to carry out or understand development. This highly practical book explains how to implement structured development rather than explaining what it is. The book treats the techniques of structured development as practical tools rather than theoretical ideas.
