Mechatronics and Automation Technology Jinyang Xu, 2023-01-15

With the development of science and technology, mechatronics and automation have changed the face of the traditional machinery manufacturing industry and become an important aspect of information technology and modern industrial production with a huge impact in many diverse fields such as manufacturing, robotics, automation, the automobile industry, and biomedicine. This book contains the proceedings of ICMAT 2022, the 2022 International Conference on Mechatronics and Automation Technology, held as a virtual event due to restrictions related to the COVID-19 pandemic and hosted in Wuhan, China, on 29 and 30 October 2022. The ICMAT conference is an ideal platform for bringing together researchers, practitioners, scholars, academics, and engineers from all around the world to exchange the latest research results and stimulate scientific innovations. The conference received a total of 117 submissions, of which 82 papers were accepted for presentation and publication after a rigorous process of peer review. The topics covered include mechanical manufacturing and equipment, robotics, information technology, automation technology, automotive systems, biomedicine, and other related fields. The book provides an overview of technologies and applications in mechatronics and automation technology, as well as current research and development, and will be of interest to researchers, engineers, and educators working in the field.
