

The Dice Game

Three players A, B, and C play a game with a single die.

The rules of the game are:

- + Player A always goes first. A rolls the die. If the die lands showing a 1, then A wins the game. If A does not throw a 1, then B has a turn.
- + Player B rolls the die. If the die lands showing a 2 or 3, then B wins the game. If B does not throw a 2 or 3, then C has a turn.
- + Player C rolls the die. If the die lands showing a 4, 5, or 6, then C wins the game. If C does not throw a 4, 5, or 6, then A starts again.

This procedure continues until there is a winner.

INVESTIGATE

1. Determine a **hypothesis** about who may be the most likely winner (based on the reading of the rules, not on any actual calculations)
2. The **probabilities** of each player (A, B, and C) winning the game
NOTE: Calculate the probabilities with their first roll only!
3. Who will be the **most likely winner**? (based on your calculations from part two)
4. What is the **most likely length of the game** in terms of the number of rolls of the dice
NOTE: You may need to calculate new probabilities for each player as they may have a second roll of the die.
HINT: When do you stop calculating?!
