Research Libraries, 1978     **Walford's Guide to Reference Material: Science and technology** Marilyn Mullay, Library Association, 1989 The Brit counterpart to Sheehy in which it is recommended The new edition places the author title subject indices in each volume Many entries cite reviews from other sources Rather tiresome recitation of selected chapter contents 6 000 entries with references in the annotations to one or two thousand further books Covers sci tech and paleontology anthro patents medicine trades and crafts Arranged by UDC classification Provides no prices Available in the US from

American Library Assn Annotation copyrighted by Book News Inc Portland OR *The development of Information Systems and emerging business models* Jan Harder, 2021-12-22 Seminar paper from the year 2021 in the subject Business economics Information Management grade 2 7 Lund University School of Economics and Management language English abstract

Disruptive technologies have fundamentally changed the way profits are created and therefore the business models of both startups and legacy companies The transformation of information systems as a research discipline dedicated to this topic will be discussed to then address current research on digital business models Based on the most promising technologies of the next years emerging business models will be presented It s nothing new that business models are changing due to new technologies but nowadays it s not just about selling your goods online but about completely new business models How is it that some companies become successful with their digital business models and others fail and what factors can or must be considered This is one of the tasks of the information systems discipline However since the researcher have different points of view that evolve over time and since information systems must repeatedly justify itself as a discipline first an overview of its development will be provided Then the technologies from the Gartner Hype Cycle with the highest expectations will be presented such as artificial intelligence which can itself create artifacts such as source code or design To better analyze the potential value creation opportunities that can arise from these technologies the basics of business models will first be presented and in particular how business models must be adapted to the new digital possibilities
