**Software Engineering and Formal Methods** Bernd-Holger Schlingloff, Ming Chai, 2022-09-21 This book constitutes the refereed proceedings of the 20th International Conference on Software Engineering and Formal Methods SEFM 2022 which took place in Berlin Germany in September 2022 The 19 full and 3 short papers included in this book were carefully reviewed and selected from 62 submissions They were organized in topical sections as follows software verification program analysis verifier technology formal methods for intelligent and learning systems specification and contracts program synthesis temporal logic and runtime methods      *Business Modeling and Software Design* Boris Shishkov, 2016-06-13 This book contains revised and extended versions of selected papers from the Fifth International Symposium on Business Modeling and Software Design BMSD 2015 held in Milan Italy in July 2015 The symposium was organized and sponsored by the Interdisciplinary Institute for Collaboration and Research on Enterprise Systems and Technology IICREST being co organized by Politecnico di Milano and technically co sponsored by BPM D Cooperating organizations were Aristotle University of Thessaloniki AUTH the U Twente Center for Telematics and Information Technology CTIT the BAS Institute of Mathematics and Informatics IMI the Dutch Research School for Information and Knowledge Systems SIKS and AMAKOTA Ltd BMSD 2015 received 57 paper submissions from which 36 papers were selected for publication in the BMSD 15 proceedings 14 of those papers were selected as full papers Additional post symposium reviewing was carried out reflecting both the qualities of the papers and the way they were presented 10 best papers were selected for the Springer edition mainly from the BMSD 15 full papers The 10 papers published in this book were carefully revised and extended following the reviewers comments from the papers presented The selection considers a large number of BMSD relevant research topics from business processes related topics such as process mining and discovery dynamic business process management and process aware information systems and business process models and ontologies including reflections into the Business Model Canvas through software engineering related topics such as domain specific languages and software quality and technical debt and semantics related topics such as semantic technologies and knowledge management and knowledge identification to topics touching upon cloud computing and IT enabled capabilities for enterprises      *The business model cycle* Sophia von Berg, 2020-12-17 Today firms all over the world have to deal with dynamic business environments Fast moving digitalization has made information more transparent strengthening the role of the customer At the same time the provider can have a much closer relationship with the user thanks to real time communication However corporate practice does not have a process for developing dynamic business models and user centric business models that can be designed and changed using smart technologies have not yet been systematically integrated To stay competitive companies need to rise to this challenge The aim of this dissertation was to develop a dynamic user centric process model for business model design and change and to evaluate the model s ability to maintain a competitive advantage in the mobility sector First the differences between static dynamic and user centric

business models and their corresponding attributes were deduced Then these findings were combined into a process model using system dynamics logic This model considers the user a co creator of value and helps managers react to real time changes in their business model environment Finally a mobility sector case study is presented to highlight the relevance of this model to real world application This business model cycle BMC supports the strategic management of dynamic user centric business model design and change activities It describes a step by step procedure of business model design that includes ideation prototyping and integration of business model options Moreover it allows continuous monitoring of the business model environment and adaption of the model accordingly At the same time bidirectional interaction between the user and provider is possible allowing the provider to adapt to their users needs The BMC is unique in that these processes can take place simultaneously Finally the real world case study in the mobility sector confirmed that using the BMC for strategic management maintains a lasting competitive business advantage
