the area of collaborative networks is being consolidated as a new discipline Camarinha Matos Afsarmanesh 2005 that  
encompasses and gives more structured support to a large diversity of collaboration forms In terms of applications besides  
the traditional sectors represented by the advanced supply chains virtual enterprises virtual organizations virtual teams and  
their breeding environments new forms of collaborative structures are emerging in all sectors of the society Examples can be  
found in e government intelligent transportation systems collaborative virtual laboratories agribusiness elderly care silver  
economy etc In some cases those developments tend to adopt a terminology that is specific of that domain often the involved  
actors in a given domain are not fully aware of the developments in the mainstream research on collaborative networks For  
instance the grid community adopted the term virtual organization but focused mainly on the resource sharing perspective  
ignoring most of the other aspects involved in collaboration The European enterprise interoperability community which was  
initially focused on the intra enterprise aspects is moving towards inter enterprise collaboration Collaborative networks are  
thus becoming a pervasive paradigm giving basis to new socio organizational structures     **The Official Year-book of the
