**India. Parliament. Rajya Sabha**

## **Consumer Studies November 2014 Memorandum:**

**The Welsh Language Commissioner in Context** Diarmait Mac Golla Chríost, 2016-07-20 It is the first book on the subject much of the research data provides a unique insight to the development of government policy and is exclusive to this book several of the research results are quite striking and will be of great interest to academics and policy actors alike

*Vulnerable Consumers and the Law* Christine Riefa, Severine Saintier, 2020-10-27 This book charts the difficulties encountered by vulnerable consumers in their access to justice through the contributions of prominent authors academic practitioners and consultants in the field of consumer law and access to justice It demonstrates that despite the development of ADR access to justice is still severely lacking for the vulnerable consumer The book highlights that a broad understanding of access to justice which encompasses good regulation and its public enforcement is an essential ingredient alongside access to the mechanisms of traditional private justice courts and ADR to protect the vulnerable consumer Indeed many of the difficulties are linked to normative obstacles and lack of access to justice is primarily a vulnerability in itself that can exacerbate existing ones In addition because it may contribute to pushing already vulnerable consumers into social exclusion it is not simply about economic justice but also about social justice The book shows that lack of access to justice is not irreversible nor is it necessarily linked to consumer apathy New technologies could provide solutions The book concludes with a plea for developing inclusive justice systems with more emphasis on public enforcement alongside effective courts systems to offer the vulnerable with adequate means to defend themselves This book will be suitable for both students and practitioners and all those with an interest in the justice system

**Market and Competition Authorities** Annetje Ottow, 2015-03-26 Market and competition authorities operate in a complex environment with conflicting stakeholder demands Balancing the various interests of the authority and stakeholder in an objective and impartial manner is strategic to achieving the goals of the legislation imposed In a fresh approach examining the actions of an authority when a regulation is applied Annetje Ottow argues the vital importance of the behaviour of authorities focusing on five fundamental good agency principles legality independence transparency effectiveness and responsibility or LITER These principles provide agencies and those reviewing their actions with a framework for agency design and action Combining theory and practice to provide insight into agencies organization and behaviour this book outlines and analyses behavioural issues using an ecosystemic method addressing how independent agencies should be assessed and which principles should apply Using cases from the Netherlands and the UK Ottow examines the key processes of authorities against the LITER principles and opens the debate on how to regulate the agency

**Overcoming Barriers to Deployment of Plug-in Electric Vehicles** National Research Council, Transportation Research Board, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Overcoming Barriers to Electric-Vehicle Deployment, 2015-06-26 In the past few years interest in plug in electric vehicles PEVs has grown Advances in battery and other technologies new federal standards for carbon dioxide

emissions and fuel economy state zero emission vehicle requirements and the current administration's goal of putting millions of alternative fuel vehicles on the road have all highlighted PEVs as a transportation alternative. Consumers are also beginning to recognize the advantages of PEVs over conventional vehicles such as lower operating costs, smoother operation and better acceleration, the ability to fuel up at home and zero tailpipe emissions when the vehicle operates solely on its battery. There are, however, barriers to PEV deployment including the vehicle cost, the short all electric driving range, the long battery charging time, uncertainties about battery life, the few choices of vehicle models and the need for a charging infrastructure to support PEVs. What should industry do to improve the performance of PEVs and make them more attractive to consumers? At the request of Congress, *Overcoming Barriers to Deployment of Plug in Electric Vehicles* identifies barriers to the introduction of electric vehicles and recommends ways to mitigate these barriers. This report examines the characteristics and capabilities of electric vehicle technologies such as cost, performance, range, safety and durability and assesses how these factors might create barriers to widespread deployment. *Overcoming Barriers to Deployment of Plug in Electric Vehicles* provides an overview of the current status of PEVs and makes recommendations to spur the industry and increase the attractiveness of this promising technology for consumers. Through consideration of consumer behaviors, tax incentives, business models, incentive programs and infrastructure needs, this book studies the state of the industry and makes recommendations to further its development and acceptance.

**EU Law of Competition and Trade in the Pharmaceutical Sector** Pablo Figueroa, Alejandro Guerrero, 2019. This book provides a systematic analysis of the law and practice of EU competition and trade in the pharmaceutical sector. Authored by leading private practitioners, economists, scholars and high level officials at competition regulators, this work provides valuable insider knowledge on the application of law and policies to the pharmaceutical industry. The work contains extensive commentary on the legislation and the latest case law and administrative precedents in this sector at both EU and national level, including certain significant jurisdictions e.g. the US, China. Coverage of various key developments includes the recent pay for delay antitrust investigations, the perennial issues around parallel trade and an examination of mergers among pharmaceutical companies and medical devices manufacturers. In addition to the legal analysis, it offers vital economic and business perspectives to ensure that the reader has the full range of tools with which to prepare for cases and conduct transactions within the pharmaceutical industry.

**Annual Report** Board of Governors of the Federal Reserve System (U.S.), 2014. **Civic Engagement in Food System Governance** Alan R. Hunt, 2015-10-05. The local food movement is one of the most active of current civil engagement social movements. This work presents primary evidence from over 900 documents, interviews and participant observations and provides the first descriptive history of local food movement, national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013, together with reviews of both the American and British local food movements. It provides a US/UK comparative context, significantly updating earlier comparisons of American, British and European farm and rural policies. The

comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences
