Control is an informative text on the field's current best practices      Construction Management Daniel W. Halpin, 2010-10-18 The construction professional has to be a jack of all trades and master of all This text covers a wide range of subjects reflecting the breadth of knowledge needed to understand the dynamics of this large and complex industry This edition introduces extended coverage in the scheduling area to address more advanced and practice oriented procedures such as Start to Start Finish to Finish and similar relationship between activities in a network schedule      **Infrastructure Development and Construction Management** J. C. Edison, 2020-10-12 This is a comprehensive book on infrastructure development and construction management It is written keeping in mind the curricula of construction management programmes in India and abroad It covers infrastructure development the construction industry in India financial analysis of the real estate industry in India economic analysis of projects tendering and bidding contracts and contract management FIDIC conditions of contract construction disputes and claims arbitration conciliation and dispute resolution international construction project exports and identifying analysing and managing construction project risk Thus this book covers most of the construction management activities that are carried out at different stages of a construction project This is an essential book for students of construction management construction professionals academicians and researchers      *Construction Digitalisation* Douglas Aghimien, Clinton Aigbavboa, Ayodeji Oke, Wellington Thwala, 2021-07-25 This book explores construction digitalisation particularly in developing countries The book conceptualises a digitalisation capability maturity model that will enable construction organisations to self assess and benchmark their digital capabilities in their quest for digital transformation Digitalisation offers a significant solution to the age long problems of the construction industry Research shows that when construction organisations transform from a traditional service delivery approach to a more digitalised approach significant improvement in project delivery and better competitive advantage for these organisations will be attained The attainment of these benefits is evident in developed countries where the digitalisation of construction activities continues apace Unfortunately the story is not the same for construction organisations in developing economies While some organisations might be willing to be digitally transformed most have no clue how to go about it To this end this book provides guidelines for construction organisations seeking to transform their entities digitally Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries

**Construction Project Management** Frederick E.
