

# A QUICK GUIDE TO HEAD LICE

## SYMPTOMS + DETECTION

The main symptom is an itchy scalp. Children may hardly notice head lice or may have only a vague scalp irritation.

Move a fine-tooth comb through wet hair from the scalp outward. Lice are usually found at the back of the head or behind the ears.

Eggs (or nits) are oval-shaped, grayish white, and can be seen as tiny globules firmly stuck to the base of hair shafts. They're easier to see because they typically greatly outnumber lice.

## CARE

Use a special shampoo, cream, or lotion to kill the lice eggs. To get rid of them, use a fine-tooth comb to carefully pick them out.

Wash your bedding and clothes in hot water. These items should probably be dried in a drying machine that reaches 130° F (54° C) for about 30 minutes.

Place anything that can't be washed in airtight plastic bags for 2 weeks to kill the lice.

## TRANSMISSION

Head lice are most common among girls aged 5-11, but can affect almost anyone. The infestation is spread by close personal contact and possibly by shared combs, brushes, hats, and other personal items.

Being clean does not prevent getting head lice. There is no association between head lice and poor hygiene or low socioeconomic status.
