Ann Hollifield, 2023-01-10 In the early twenty first century the international relations literature still posits realism as a dominant paradigm in the Western School This volume introduces alternative frames of reference that address the deficiencies of liberalism with its lack of sufficient attention to ethnic diversity By drawing on constructivism with its focus on framing particularly the influence in instrumentalist terms of narratives shaped by the media this volume explores that influence by analysing case studies in historical context In 2020 the world's present yet unequal experiences of the triptych personal data global pandemic and social protests lead us to introduce personal data Image I the mesh region Image II and the distributed ecosystem Image III to capture the dynamic transformative nature of the changing relationship between structure and agency **Infectious Diseases** ,2015-07 Universities and Innovation Economies Peter Murphy, 2016-02-24 Students drop out of universities in large numbers many graduate to jobs that do not require a degree and a large number learn little at university whilst graduate salaries have shrunk over time and student loan debt and default have grown University research achievements have declined while university administration has expanded massively. The contemporary university is mired in auditing regulation waste and aimlessness and its contribution to serious social innovation has deteriorated markedly The miserable state of the universities reflects a larger social reality as bureaucratic capitalism has replaced creative capitalism Universities and Innovation Economies examines the rise and fall of the mass university and post industrial society considering how we might revitalize economic and intellectual creativity Looking to a much more inventive social and economic paradigm to drive long term growth the author argues for a smaller leaner more effective university model one capable of delivering a greater degree of high level discovery and creative power A potent critique of the post industrial mass university that urges a reimagination of universities as places of discovery and invention this book will appeal to readers interested in higher education creativity social theory the sociology of work and organisations political economy pedagogy and public policy Comparative CSR and Sustainability Gabriel Donleavy, Carlos Noronha, 2022-12-30 This book breaks new ground by providing a structured and cohesive set of contributions on the actions developments problems and theories of corporate social responsibility CSR With new case studies from the UN s Least Developed Countries LDCs contributors in this book investigate how firms in Eastern and Western countries are responding to and making use of evolving CSR quidelines The book addresses the following questions is CSR simply greenwashing or an authentic commitment to responsible corporate citizenship Has globalization drawn CSR conduct in LDCs closer to that of industrialized countries

Stakeholder theory actor network theory and a new orbital theory of accountability are applied to give coherence to the case studies Other chapters address greenwashing in reports the impact of CSR in socially stigmatized occupations an analysis on what responsibility precisely entails in CSR and the interface between law and CSR The book also considers the impact of COVID 19 on the hospitality industry and includes a contribution from Ukrainian scholars one written while their city of Kharkiv was under attack by Russian forces This book will be a useful reference to those interested in discussions on crises climate change and SDGs and realizing sustainable goals through CSR Integrating Clinical Research into Epidemic Response National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Board on Global Health, Committee on Clinical Trials During the 2014-2015 Ebola Outbreak, 2017-07-26 The 2014 2015 Ebola epidemic in western Africa was the longest and most deadly Ebola epidemic in history resulting in 28 616 cases and 11 310 deaths in Guinea Liberia and Sierra Leone The Ebola virus has been known since 1976 when two separate outbreaks were identified in the Democratic Republic of Congo then Zaire and South Sudan then Sudan However because all Ebola outbreaks prior to that in West Africa in 2014 2015 were relatively isolated and of short duration little was known about how to best manage patients to improve survival and there were no approved therapeutics or vaccines When the World Heath Organization declared the 2014 2015 epidemic a public health emergency of international concern in August 2014 several teams began conducting formal clinical trials in the Ebola affected countries during the outbreak Integrating Clinical Research into Epidemic Response The Ebola Experience assesses the value of the clinical trials held during the 2014 2015 epidemic and makes recommendations about how the conduct of trials could be improved in the context of a future international emerging or re emerging infectious disease events **The Kiss of Death** Andrea Kitta, 2019-10-15 Disease is a social issue not just a medical issue Using examples of specific legends and rumors The Kiss of Death explores the beliefs and practices that permeate notions of contagion and contamination Author Andrea Kitta offers new insight into the nature of vernacular conceptions of health and sickness and how medical and scientific institutions can use cultural literacy to better meet their communities needs Using ethnographic media and narrative analysis this book explores the vernacular explanatory models used in decisions concerning contagion to better understand the real fears risks concerns and doubts of the public Kitta explores immigration and patient zero zombies and vampires Slender Man HPV and the kiss of death legend as well as systematic racism homophobia and misogyny in North American culture to examine the nature of contagion and contamination Conversations about health and risk cannot take place without considering positionality and intersectionality In The Kiss of Death Kitta isolates areas that require better communication and greater cultural sensitivity in the handling of infectious disease public health and other health related disciplines and industries Collection of Covid-19 Induced Biases in Medical Research Reza Rastmanesh, Vasiliki Epameinondas Georgakopoulou, Martin Wolkewitz, 2025-06-02 The spread of COVID 19 has changed many aspects of people's social lives individual s behaviors and healthcare procedures Furthermore it

has changed many physiological responses and consequently it is expected that many medical studies are influenced by multiple hidden biases posed by Covid 19 pandemic mediated directly or indirectly by face mask wearing or by Covid 19 itself For instance face mask wearing has been reported to produce a drastic bias in studies of endocrinology ophthalmology particularly dry eye and ocular diseases sleep studies cognitive biases such as emotion recognition accuracy studies etc and sex bias differences just to mention a few It can be estimated that many of such biases have been left undiagnosed in other disciplines of medicine This Research Topic calls for papers reporting any type of unreported biases posed by Covid 19 pandemic and or face mask wearing It is expected that submitted manuscripts will help better and unbiased interpretation of clinical findings methodological developments registered clinical trials cohort studies and comparative studies pre and post Covid 19 pandemic **Contemporary Authors New Revision Series**, 2001-08 In response to the escalating need for up to date information on writers Contemporary Authors New Revision Series brings researchers the most recent data on the world's most popular authors.
