Reeves, 2000 From 1990 to 2000 a qualitative study of the implementation of the Kentucky Education Reform Act KERA was conducted in four small rural school districts in Kentucky KERA reflects key components of what would later be termed systemic reform a unifying set of goals that all students must attain a coherent system of instructional guidance and a restructured governance system In addition KERA has other components such as the ungraded primary program This book presents findings from the second phase of the 10 year study focusing on the effects of KERA on curriculum instruction and student learning in six elementary schools in the four districts In all six schools student achievement improved but in five schools teachers focused more on improving whole school performance on achievement measures than on improving the learning of each student and had difficulty raising their expectations for low income and minority children KERA reforms increased classroom writing the variety of instructional strategies integration of subject matter classroom computer use and open ended response and portfolio items for classroom assessment However teachers had difficulty moving beyond a teacher directed approach and only a few integrated technology effectively into the curriculum Testing for accountability became the focus of the assessment system and the KERA goal of continuous performance based student evaluation was neglected School based decision making councils did not make most key decisions as intended by KERA The findings also note the importance of school leadership accountability goals and the need for more time for teachers in meeting school professional development Ten appendices present KERA goals dissemination efforts data collection and research questions for both phases of the study interview protocols and characteristics of parents students and community members interviewed Contains 151 references TD

**Expository Discourse in Children, Adolescents, and Adults** Marilyn A. Nippold, Cheryl

M. Scott, 2013-03-07 School success in the 21st century requires proficiency with expository discourse the use and understanding of informative language in spoken and written modalities This occurs for example when high school students read their textbooks and listen to their teachers lectures and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations Although many students are proficient with the expository genre others struggle to meet these expectations This book is designed to provide information on the use and understanding of expository discourse in school age children adolescents and young adults Recently researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders Although many books have addressed the development of conversational and narrative discourse by comparison books devoted to the topic of expository discourse are sparse This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders It will be of interest to a range of professionals including speech language pathologists teachers linguists and psychologists who are concerned with language development and disorders
