INSTALLING A TONEARM

- 1) Before removing the arm board, determine where to install the tonearm, considering the swing angle of the tonearm, the opening and closing of the dust cover and the cut-out circles at the bottom of the cabinet. Also carefully follow the instruction manual provided with your tonearm. Mark the tonearm position on the arm board referring to the platter shaft.
- 2) Remove the three arm board fixing screws using a Philips (+) screw driver and push the rear side of the arm board to the turntable (arrow 1 in Fig. 1). The arm board inclines ready for being pulled out in the arrow direction 2 in Fig. 1.

NOTE: The marking on the back of the arm board indicates front side. Make sure when you return the arm board so that this front marking faces to front of cabinet. If the arm board is placed inverted, it becomes uneasy to be pulled out.

- 3) Drill necessary hole and install the tonearm. Connect an output cord set, anchoring it with the cord clasper and screw provided. Return the arm board and fix it.

REPLACEMENT TONEARM BOARD

Specify part number "1018012209 ARM BOARD" at your DENON dealer.

ATTACHING THE DUST COVER

- 1) Align the slots of the dust cover flings with the tabs on the hinges, and slide them firmly in the arrow direction in Fig. 2.

When removing the dust cover, open it all the way and then pull it off the hinges in the opposite direction of the arrow.

- NOTE:** If the dust cover flings are not pushed completely on the hinges, the dust cover will not close completely. When mounting or removing the dust cover, grip the cover close to the flings as shown in Fig. 2.

- 2) The dust cover hinges are adjusted at the factory so that the dust cover will stay at any angle between 30° to 60° when it is opened. If you wish to adjust this angle, turn the adjusting screw on the bottom of each hinge with a Philips screw driver as shown in Fig. 3. Turning the screw clockwise from bottom decreases the opening angle, and turn it counterclockwise increases the angle.

INSULATOR LEG HEIGHT ADJUSTMENT

The insulator legs can be individually adjusted. (They are packed with their lowest position.) After placing the set where you are going to use it, turn and adjust the height of each leg until the turntable is level. (See Fig. 4.)

- NOTE:** The spring action of the insulator legs may be felt considerably soft. They are so made to have a very low resonant frequency in order to cut off vibrations from outside. It is advisable to adjust the legs at their lowest possible level (2 to 3mm before the screw is locked.)
