

A graphic illustration featuring a light gray laptop with a white screen. A yellow notepad with a hole punch at the top left is placed on the laptop screen. The notepad has a large black letter 'T' at the top, followed by a dotted line and several horizontal lines for writing. An orange pencil with a red eraser and a sharpened lead tip is positioned diagonally across the bottom right of the notepad. To the left of the notepad, there is a green rounded square containing the letters 'AI' in bold black font. The entire scene is set against a dark gray background with a subtle pattern of small white dots.

powered education and make a real difference in the lives of your students **Business Strategy Architectures** Michael J Liley ,Dr Catherine L Pham,2024-03-30 In the competitive world of middle management distinguishing oneself is a constant struggle for those with leadership aspirations in both large corporations and small to medium enterprises SMEs This silent battle involves a delicate balance between demonstrating team player skills and standing out as potential future leaders The challenge lies in navigating this path and maintaining upward momentum I ve always found it beneficial to view my career as a brand my unique professional identity This perspective prompts you to consider your brand s objectives its positioning within and outside an organization and the personality you want it to embody While some may view this as cynical or manipulative it s simply a matter of defining your professional values acceptable behaviours and the image you wish to project to the business world It s about living your values a crucial aspect for any budding business leader A key insight I gained early in my career was the importance of developing my business profile external to my employer I recall attending a Chamber of Commerce meeting at the start of my career where I chose to observe and learn rather than actively participate The vocal individuals were the ones who secured all the committee positions From then on I learned to voice my opinions and project my brand thereby enhancing my business profile Success in business is often attributed to personal performance but it requires more than just that I remember conducting annual appraisals for my direct reports when I was heading a division of an international corporation My extensive business experience spans Australia Asia North America and Europe and includes running businesses and consulting I believe these insights will be valuable to middle and senior management in corporations and SME owners While some examples may seem outdated due to the nearly 40 year span of my career I have updated the narrative to suit current conditions However the principles they illustrate remain as relevant today as they were then and there are certainly lessons to be learned I have also contextualized these insights to the present day During much of my corporate career digitization and the dominance of the web were in their infancy Therefore I begin the book by discussing technological change in the context of the present day and identifying the significant changes expected over the next five years I believe the upcoming changes brought about by AI will be even more profound than those brought about by the internet digitization and the personal communications revolution from social media and handheld devices I outline what this might look like and how it will impact business and everyday life This book is not intended to be a comprehensive guide on running a business Instead it addresses selected issues by providing real examples describing how they were tackled how they added value and what lessons were learned It also discusses how these examples contributed to the competitiveness of the enterprise By sharing these examples I hope to provide you the reader with insights on how to address similar problems in your workplace This will help you stand out from the management crowd and become a business leader a tall poppy
