Abstract: This paper presents a new approach to the design of a control system for a nonlinear system. The system is first transformed into a linear system by a nonlinear transformation. The linear system is then controlled by a linear controller. The nonlinear transformation is designed such that the linear system is stable and the nonlinear system is controlled. The nonlinear transformation is designed such that the linear system is stable and the nonlinear system is controlled. The nonlinear transformation is designed such that the linear system is stable and the nonlinear system is controlled.
