

NORMAL MEMORY LOSS VERSUS DEMENTIA

RECOGNIZING THE DIFFERENCE

Forgetting someone's name or a word during conversation, but remembering later.

Forgetting an appointment from time to time.

Forgetting what day it is occasionally, but figuring it out later.

Getting irritated when one's normal routine is altered.

Making bad decisions occasionally when it comes to money.

Feeling tired or worn out from time to time & wanting to stay home to rest.

Losing an item occasionally.

Vision changes due to cataracts, or needing a new glasses prescription.

Losing oneself in conversation, stopping abruptly & forgetting what to say next, repeating oneself often.

Forgetting recently learned information, or having to ask for it over & over. Increasing reliance on others for help remembering to complete tasks.

Completely losing track of the day or season. Forgetting where you are & how you got there.

Getting extremely agitated by a change in routine, especially when the agitation is atypical of one's personality.

Consistently exhibiting poor financial decision-making ability.

Removing oneself from favorite hobbies due to forgetfulness or difficulty completing; becoming isolated & not wanting to venture out of the comfort of one's home.

Putting items in strange places & being unable to retrace one's steps to find them.

Increased difficulty understanding what one is seeing.
