Professional Empowerment in the Software Industry through Experience-Driven Shared Tacit Knowledge Hui Chen, Miguel Baptista Nunes, 2023-05-19 This book addresses the identification and classification of knowledge acquired through experience that results from engaging in professional activities within the software industry As a result of this study the book presents an ontology of such professional activities that require and enable the acquisition of experience and that in turn are the basis for tacit knowledge creation The rationale behind the creation of such an ontology was based on the need

to externalize this tacit knowledge and then record such externalizations so that these can be shared and disseminated within and across organizations The book discusses the very concise manner in which experienced software development practitioners in China understand the nature and value of experience in the SW industry effectively communicate with other stakeholders in the software development process are able and motivated to actively engage with continuous professional development are able to share knowledge with peers and the profession at large and effectively work on projects and exhibit a sound professional attitude both internally to their own company and externally to customers partners and even competitors The book also discusses the ontology and the qualitative process that are generated by bridging two extremely topical aspects of practice in the software industry namely employability skills and competencies The book is of interest to academics in the areas of knowledge management and information systems as well as human resources practitioners concerned with selection and development and knowledge and information professionals in software organizations

evaluation of existing alternative approaches to grassroots preacher training It also proposes broad principles for effective preacher training and offers a practical solution The 20th century had seen the Christian church in Africa grow 36 fold to 360 million This amazing growth is arguably the largest religious change in human history in such a short period It has shifted the focus of Christianity from North to South This rapid growth is debatably considered by some missiologists and theologians to have resulted in an African church a mile wide and an inch deep That is a church of great size but lacking in spiritual depth The rapid growth has led to insufficient numbers of trained leaders being available to oversee their congregations Most leaders are unpaid Untrained or undertrained leaders have an inadequate knowledge of scripture and lack understanding of its interpretation They also lack the skills they need to communicate its truths Even so they preach up to 90% of the sermons in rural Africa Despite a tremendous hunger for training among many of those preachers traditional college based theological education cannot keep up with the demand for trained pastors and preachers in an affordable or culturally appropriate manner
