Des espaces euclidiens aux espaces de Hilbert Edoardo Provenzi, 2021-04-01 Cet ouvrage analyse la transition des espaces euclidiens de dimension finie aux espaces de Hilbert de dimension infinie notion parfois difficile appréhender pour les non spécialistes L'accent est mis sur les analogies et les différences entre les propriétés de la dimension finie et celles de la dimension infinie en remarquant l'importance fondamentale de la cohérence entre la structure algébrique et celle topologique qui permet aux espaces de Hilbert d'être les structures de dimension infinie les plus proches des espaces euclidiens Le fil rouge de cet ouvrage est la transformée de Fourier Un accent particulier est mis sur la transformée de Fourier discrète DFT qui permet de montrer des applications explicites au traitement des signaux et des images numériques La structure géométrique des espaces de Hilbert et les plus importantes propriétés des opérateurs linéaires bornés sur ces espaces sont également traités Les théorèmes sont présentés avec des preuves détaillées et des exercices avec solution permettent de voir des applications immédiates des résultats théoriques
