

Key Difference Between UX and UI

UX Design	VS	UI Design
Focuses on the holistic experience of the user.		Focuses on the specific visual touchpoints of the user.
Centers on strategy, structure, and interaction design.		Centers on surface-level aspects of design, including visuals.
Involves studying the user's journey, and designing information architecture.		Involves designing the tangible elements of the experience, such as the choice of elements and how they interact.
Outputs include personas, user journey maps, wireframes, prototypes.		Outputs include mockups, high-fidelity layouts, and prototypes.
Incorporates a user's environment, mood, and context.		It is more tangible as users directly interact with the UI.
