Department of the Army, 2010 Field manual FM 3-39.40 is aligned with FM 3-39 the military police keystone FM 3-39.40 provides guidance for commanders and staffs on internment and resettlement I R operations This manual addresses I R operations across the spectrum of conflict specifically the doctrinal paradigm shift from traditional enemy prisoner of war EPW operations to the broader and more inclusive requirements of detainee operations Additionally FM 3-39.40 discusses the critical issue of detainee rehabilitation It describes the doctrinal foundation principles and processes that military police and other elements will employ when dealing with I R populations As part of internment these populations include U S military prisoners and multiple categories of detainees civilian internees CIs retained personnel RP and enemy combatants while resettlement operations are focused on multiple categories of dislocated civilians DCs Military police conduct I R operations during offensive defensive stability or civil support operations I R operations include military police support to U S military prisoner and detainee operations within operational environments OEs ranging from major combat operations to humanitarian assistance missions in support of a host nation HN or civil agency I R operations are a major subordinate Army tactical task under the sustainment warfighting function See FM 7-15 Placement under the sustainment warfighting function does not mean that I R operations do not have relevance in the other warfighting functions While I R is listed under the sustainment warfighting function it should be noted this is not a specified or implied mission of all sustainment units or commands Most sustainment units provide logistics personnel services and health service support to I R operations Military police are uniquely qualified to perform the full range of I R operations They have the requisite skill sets provided through specific training and operational experience The skills necessary for performing confinement operations for U S military prisoners in permanent facilities are directly transferable and adaptable for tactical confinement of U S military prisoners and detention of detainees All military police units are specifically manned equipped and trained to perform I R operations across the spectrum and those identified as I R units are the specialists within the Army for this role FM 3-39.40 depicts the changes in terminology from the focus on the contiguous battlefield to reflect the types of operations being conducted in today's OEs These changes address the modifications made to previous EPW processing operations The terms division forward central collection point and corps holding area no longer apply They have been replaced with the terms detainee collection point DCP brigade level detainee holding area DHA division level theater internment facility TIF and strategic internment facility SIF This manual recognizes the role of police intelligence operations in I R operations and enhances the critical importance of military police and military intelligence interaction at all echelons It further highlights the long

standing requirement to treat all individuals humanely according to applicable U S laws and regulations international laws execution orders fragmentary orders FRAGOs and other operationally specific guidelines such as Department of Defense DOD policies Moreover it stipulates that ill treatment of U S military prisoners detainees EPWs CIs and RP and DCs is strictly prohibited regardless of any circumstances or the chaos of major operations FM 3 39 40 aligns with FM 3 0 FM 3 39 FM 7 15 and other Army and joint doctrine to include Joint Publication JP 3 63 This manual is organized into 10 chapters with 14 appendixes to provide additional details on I R topics Chapters 1 through 3 follow the flow of FM 3 39 and describe the military police function of I R operations Chapters 4 through 6 focus primarily on detainee operations to include planning preparing executing and sustaining all I R operations Chapters 7 through 10 focus on the confinement of U S military prisoners rehabilitative programs for U S military prisoners and detainees parole and release or transfer programs and resettlement operations for DCs Preface Florida Administrative Register ,2006-07 *Enemy Combatants, Terrorism, and Armed Conflict Law* David K. Linnan,2008-01-30 With a renewed emphasis on national and homeland security the United States is once again seeking to balance the needs of the state with both the rights of its citizens as well as those of other nations This book represents an interdisciplinary approach to the legal dilemmas borne out by the war on terror against the specific background of Afghanistan Iraq and this new kind of conflict It is a strong contribution to a broader debate visible since 9 11 which will remain in the public eye for the foreseeable future It addresses the overlap between religion ethics armed conflict and law within the context of the current conflict While many issues in areas such as intelligence reconciliation of civil liberties dealing with terrorist threats and the permissible bounds of interrogation treatment of prisoners and laws governing armed conflict have long standing precedents under domestic and international law this war has challenged even long standing legal interpretations The contributors to this volume explore those precedents and contemporary challenges to them Now that traditional wars between nation states are no longer the rule the terrorist threat has gained credence popularly terrorism and its claimed breeding ground in failed states linked in practice to issues of intervention on the territory of states harboring such groups In military circles the idea of armed struggle between modern military forces and what were formerly called guerillas has now largely been replaced by asymmetric warfare and the concept of intelligence and preventive action interchangeably within U S borders and overseas Opposing views contemplate that different and presumably lower legal standards may apply in internal armed conflicts Such legal issues are visible under current circumstances of asymmetric warfare in conjunction with questions about prisoner status and detentions including the permissible bounds of interrogation versus torture following the Abu Ghraib prison scandal in Iraq but also the treatment at the Guantanamo Bay facility of alleged Al Q aeda captives from Afghanistan All of the contributors in this book explore the changing circumstances against which these contentious new legal issues now unfold The experts strike no consensus Indeed one of the work s many strengths can be attributed to the fact that the many facets of the ongoing debate are represented
