Democracy A Short Analytical History:

Democracy Roland N. Stromberg, A Short History of Western Political Thought W. M. Spellman, 2017-09-16 This brief narrative survey of political thought over the past two millennia explores key ideas that have shaped Western political traditions Beginning with the Ancient Greeks classical emphasis on politics as an independent sphere of activity the book goes on to consider the medieval and early modern Christian views of politics and its central role in providing spiritual leadership Concluding with a discussion of present day political thought W M Spellman explores the return to the ancient understanding of political life as a more autonomous sphere and one that doesn't relate to anything beyond the physical world Setting the work of major and lesser known political philosophers within its historical context the book offers a balanced and considered overview of the topic taking into account the religious values inherited ideas and social settings of the writers Assuming no prior knowledge and written in a highly accessible style A Short History of Western Political Thought is ideal for those seeking to develop an understanding of this fascinating and important subject

Sustainable History and Human Dignity Nayef R.F. Al-Rodhan, 2022-01-01 In Sustainable History and Human Dignity Professor Nayef Al Rodhan shows that it is the human quest for sustainable governance balancing the ever present tension between nine human dignity needs and three human nature attributes emotionality amorality egoism that has and will most profoundly shape the course of history Beginning with an Ocean Model of a single collective human civilisation Al Rodhan constructs a common human story comprised of multiple geo cultural domains and sub cultures with a history of mutual borrowing and synergies If humanity as a whole is to flourish all of these diverse geo cultural domains must succeed Only thus can lasting peace and prosperity be achieved for all especially in the face of Civilisational Frontier Risks and highly disruptive technologies in the twenty first century

Democracies and the Shock of War Professor Marc Cogen, 2013-07-28 Over the course of the twentieth century democracies demonstrated an uncanny ability to win wars when their survival was at stake As this book makes clear this success cannot be explained merely by superior military equipment or a particular geographical advantage Instead it is argued that the legal frameworks imbedded in democratic societies offered them a fundamental advantage over their more politically restricted rivals For democracies fight wars aided by codes of behaviour shaped by their laws customs and treaties that reflect the wider values of their society This means that voters and the public can influence the decision to wage and sustain war Thus a precarious balance between government parliament and military leadership is the backbone of any democracy at war and the key to success or failure Beginning with the sixteenth and seventeenth century writings of Alberico Gentili and Hugo Grotius this book traces the rise of legal concepts of war between states It argues that the ideas and theories set out by the likes of Gentili and Grotius were to provide the bedrock of western democratic thinking in wartime The book then moves on to look in detail at the two World Wars of the twentieth century and how legal thinking adapted itself to the realities of industrial and total war In particular it focuses upon the impact of

differing political ideologies on the conduct of war and how combatant nations were frequently forced to challenge core beliefs and values in order to win Through a combination of history and legal philosophy this book contributes to a better understanding of democratic government when it is most severely tested at war The ideas and concepts addressed will resonate both with those studying the past and current events

African Institutions Ali A. Mazrui,Francis Wiafe-Amoako,2015-11-12

Every political system either developed or adopted has an impact on the structure of society and the level of development This book analyzes the evolution and nature of political institutions and their effect on Africa s development The challenges Africa face in developing viable institutions are not limited to the adoption of foreign institutions but are also rooted in domestic norms that define society itself Sometimes these challenges have to do with the incompatibility between foreign and domestic institutions The fundamental issue then is to understand the African societies cultures and other dynamics that have ensured stability in the past and that need to be recognized when adopting contemporary foreign institutions This comprehensive text examines three key issue areas in Africa politics society and economy It demonstrates how the lack of consideration for domestic norms and societal realities explain the weaker institutions and lack of development on the African continent The chapters examine critical issues such as gender ethnicity and constitution development legitimacy and the state the correlation between abundant resources and instability the dilemmas of political dynasties international economic regimes and Africa s economy and more Featuring many case studies including Kenya South Africa Senegal Ghana Nigeria Tanzania Morocco Togo DRC Ethiopia Rwanda the book provides some explanation of underdevelopment in Africa linking the historical and colonial realities that hinder democratic consolidation to contemporary African politics society and economy Guarding the Guardians Mathurin C. Houngnikpo,2010 This book reviews the intrusion of the armed forces in African politics by examining contemporary armies and their impact on society It revisits the various explanations of military

takeovers in Africa and disentangles the notion of the military as a progressive force The study argues the necessity of new civil military relations in Africa calling for a democratic oversight of the security forces *An Analytical and Descriptive Guide to the Materials in The History Teacher's Magazine and The Historical Outlook* Richard Harrison Shryock,1925

conventional wisdom on democratic transition in Africa civil society alone does not trigger democratization on the continent *Determinants of Democratization in Africa* fills an important theoretical gap by shedding light on the key variables to democratic transitions in Africa Mathurin C Hounnikpo demonstrates that democratic renewal in Africa depends more on the Military incumbent leaders willingness for change and foreign influence Hounnikpo shows through a study of Benin and Togo that civil society is necessary but not sufficient for democratization on the continent Classified and annotated list of
