

R interviews P or obtains from P a description of a situation reflecting the phenomenon under study. the original description is from the perspective of ordinary life or everyday world

if the data collection was by means of an interview, R transcribes verbatim. if originally a written description, R works with it as a given.

Step 1

Within the attitude of the scientific phenomenological reduction, R reads the transcription or description to grasp the basic sense of the whole situated description. Nothing is done at this stage.

Step 2

R, remaining within the scientific phenomenological reduction, then creates parts by delineating psychological units. A meaning unit is determined whenever R, in a psychological perspective and mindful of the phenomenon being researched, experiences a transition in meaning when he or she reads the description from the beginning. Slashes are placed in the description at the appropriate places

Step 3

R, still within the scientific phenomenological reduction, then transform P's everyday expressions into expressions that highlight the psychological meanings lived by P. This requires the use of free imaginative variation as well as rendering implicit factors explicit.

Step 4

Based on the transformed meaning units and still within the scientific phenomenological reduction, R uses the transformed meaning unit expression as the basis for describing the psychological structure of experience.

Descriptive Phenomenological Psychological Method An Example:

The Descriptive Phenomenological Method in Psychology Amedeo Giorgi, 2009 This comprehensive work from one of the leading thinkers in humanistic psychology provides a thorough discussion of the phenomenological foundations for qualitative research in psychology Amedeo Giorgi's examination operates out of the intersection of phenomenological philosophy science and psychology such a multidisciplinary approach allows him to challenge several long standing assumptions about the practice of psychology Giorgi asserts that empiricism is not the best philosophy for grounding the science of psychology rather the broader phenomenological theory of science permits more adequate psychological development Giorgi draws from Husserl's philosophical principles the reasons for conducting research in psychology and then offers practical steps for applying a phenomenological method and real examples of applications of the method In fact Giorgi proposes a method that is theoretically grounded in phenomenological philosophy and yet treats empirically derived data This is a rigorous but open qualitative research method that is tolerant of pararational givens as well as one that is supportive of rational criteria The analyses and methods presented in *Phenomenological Method in Psychology* will be attractive to psychologists phenomenologists and researchers involved in qualitative research throughout social and human science disciplines

Descriptive Phenomenological Psychological Method Rodger Broome, 2011 This paper is the methodology section of my doctoral dissertation that outlines the Descriptive Phenomenological Psychological Method of research as it has been taught to me by Amedeo P Giorgi Giorgi 2009 based his method on Husserl's descriptive phenomenological philosophy as an alternative epistemology for human science research This method section references Giorgi's work and the phenomenological tradition of Husserl Merleau Ponty and others Each step of Giorgi's modified Husserlian method is described and explained in the context of doing psychological research on the lived experience of the participants in my dissertation research The steps are 1 assume the phenomenological attitude 2 read entire written account for a sense of the whole 3 delineate meaning units 4 transform the meaning units into psychologically sensitive statements of their lived meanings and 5 synthesize a general psychological structure of the experience base on the constituents of the experience It is the first person psychological perspective that is sought so that an empathetic position can be adopted by the end user of the research

Reflections on Certain Qualitative and Phenomenological Psychological Methods Amedeo Giorgi, 2020-06-15 One could describe the status of psychological research today as one in which qualitative methods based upon diverse philosophies have been developing and advancing at a fast pace It is a time therefore when reflections on this state of affairs are appropriate The five essays in this book are all concerned with qualitative methods and their philosophical backgrounds Briefly the first essay contrasts the relative merits of the three most used philosophical bases for qualitative methods empirical philosophy hermeneutics and Husserlian descriptive phenomenology The second essay tries to resolve the tensions between descriptive and interpretive methods Both are of service to science but they relate

to different conditions The third essay discusses certain pitfalls that should be avoided when conducting psychological research on oneself The fourth essay describes the extension of certain guidelines when using the descriptive phenomenological method The fifth essay challenges the assumption of naturalism for psychology and argues for the development of a non naturalistic method for psychology Introduction to Phenomenology Cheryl Tatano Beck, SAGE Publications, Inc., 2019-12-20 Phenomenology is a challenging method for many students to understand and apply Introduction to Phenomenology Focus on Methodology breaks down the history methodology and application so students can more easily write proposals and conduct phenomenological research Author Cheryl Tatano Beck draws on her depth of experience in applying and teaching phenomenological methods to distill the method into a single guidebook for students and new researchers alike This introductory book provides a clearer picture of phenomenology as method and its applications to social behavioral and health sciences covering both interpretive and descriptive phenomenology from research design through analysis This book is divided into four parts Part I briefly provides the philosophical underpinnings of descriptive and interpretive hermeneutic phenomenology summarizing the main goals of the original texts Part II focuses on descriptive phenomenology while Part III concentrates on interpretive phenomenology Each type of methodology is covered in its own chapter with tables comparing the methodologies to one another so readers can better understand the differences and similarities Part IV addresses evaluating writing and teaching phenomenology Unique chapters on writing a proposal getting your study published developing a research program and preparing to teach phenomenology help complete the cycle of research and help graduate students transition from student to researcher to teacher Appendices provide study activities for students and examples of two types of phenomenological proposals *Integrating Philosophical and Scientific Approaches in Consciousness Research* Christopher Gutland, Wenjing Cai, Anthony Vincent Fernandez, 2021-06-29 *Methodological Innovations in Research and Academic Writing* Zimmerman, Aaron Samuel, 2021-10-08 Innovative methodological approaches are vital for experienced researchers and early career researchers alike to conduct research In order to provide them with the best possible resources the methodologies must be comprehensive and describe the data sources approaches to data collection and approaches to data analysis that are typically employed within the given methodological approach Methodological Innovations in Research and Academic Writing serves as a resource for graduate students and higher education faculty and presents a number of methodological innovations in research as well as applied examples of these methodologies in practice The chapters focus on the application of methodological approaches through the presentation of real world examples and descriptions of the epistemological foundations of the given methodologies so that researchers can fully articulate and justify their methodological choices in the context of their research design It is a crucial guide for graduate students who are designing and writing their doctoral dissertations as it introduces them to the best practices related to rigorous research design and academic writing This book is ideal for graduate students higher education faculty

researchers and academicians The SAGE Handbook of Qualitative Research in Psychology Carla Willig, Wendy Stainton Rogers, 2017-03-31 One of our bestselling handbooks The SAGE Handbook of Qualitative Research in Psychology is back for a second edition Since the first edition qualitative research in psychology has been transformed Responding to this existing chapters have been updated and three new chapters introduced on Thematic Analysis Interpretation and Netnography With a focus on methodological progress throughout the chapters are organised into three sections Section One Methods Section Two Perspectives and Techniques Section Three Applications In the field of psychology and beyond this handbook will constitute a valuable resource for both experienced qualitative researchers and novices for many years to come The Handbook of Humanistic Psychology Kirk J. Schneider, J. Fraser Pierson, James F. T. Bugental, 2014-02-14 The Second Edition of the cutting edge work The Handbook of Humanistic Psychology by Kirk J Schneider J Fraser Pierson and James F T Bugental represents the very latest scholarship in the field of humanistic psychology and psychotherapy Set against trends inclined toward psychological standardization and medicalization the handbook offers a rich tapestry of reflection by the leading person centered scholars of our time Their range in topics is far reaching from the historical theoretical and methodological to the spiritual psychotherapeutic and multicultural The new edition of this widely adopted and highly praised work has been thoroughly updated in accordance with the most current knowledge and includes thirteen new chapters and sections as well as contributions from twenty three additional authors to extend the humanistic legacy to the emerging generation of students scholars and practitioners **Authentic Professional Learning** Ann Webster-Wright, 2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or para professional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and financial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision making Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others' intents **New Perspectives on Inner Speech** Pablo Fossa, 2022-08-08 Inner speech has been a focus of multidisciplinary

interest It is a long standing phenomenon of study in philosophy psychology and anthropology Researchers from different disciplines have turned their efforts to understand this inherent experience of being talking to oneself In psychology Vygotsky managed to develop a complete description of the phenomenon giving rise to a great line of research related to inner speech in the human experience Including a compilation of theoretical and empirical advances related to inner speech phenomenon this book is aimed at academics and researchers in the area of psychology education and culture This book will be of interest to international research programs related to cultural psychology socio constructivism developmental psychology and education

Analyzing Adoptive Parent Interviews Using the

Descriptive Phenomenological Psychological Method Deena Shelton, Corinne Bridges, 2019 This dataset provides an example of interview analysis using the descriptive phenomenological psychological method while incorporating a theoretical framework for final data organization The data were provided by Dr Deena Shelton and Dr Corinne Wehby Bridges as a result of Dr Shelton s dissertation study chaired by Dr Bridges Dr Shelton explored adoptive parent experiences of support during the process in an effort to offer valuable information to counselors and social workers who serve adoptive families in the United States The dataset provides step by step examples using Giorgi Giorgi and Morley s 2017 descriptive phenomenological psychological method with visual examples from the original collected data The dataset files are accompanied by a teaching guide and a student guide

Process and Structure in Human Decision Making Henry

Montgomery, Ola Svenson, 1989-04-24 Fourteen contributors from six countries present recent research results in the study of decision making processes They address cognitive and evaluative issues involved in human choice and judgement Several studies model how decision makers represent and structure information involved in making choices Others discuss theory methods or group decision making Existential-phenomenological Alternatives for Psychology Ronald S. Valle, Mark King, 1978 Phenomenology and Psychological Research Amedeo Giorgi, 1985 This book is both a theoretical justification of a phenomenological and human scientific approach to psychological research and a presentation of findings in the areas of cognitive clinical and social psychology The book is important because it is the most sustained statement to date about a phenomenological approach to psychological research along with original findings to compare with mainstream psychology in crucial areas of psychology cognitive clinical and social psychology Phenomenology and Psychological Research is further clarification of the phenomenological approach to psychological research along with examples of application in four different content areas learning and thinking both examples of alternative approaches to cognitive processes self deception clinical psychology and criminal victimization social psychology As such it gives the reader who is merely curious about the possibilities of phenomenological approaches a good opportunity to evaluate its fruitfulness whereas those who are already sympathetic to the approach will find a greater articulation of the theory behind the procedures Lastly the reader will find in this study an example of a descriptive and qualitative approach to psychological research that claims to meet both phenomenological and human scientific criteria It is one of the first books to make such a claim about psychological research
