Dacum R. Lance Hogan,Robert Adams,Luke Steinke,2020-10 Many trainers and instructional designers often struggle with the connection or lack thereof between the different phases of instructional design We know that analysis is followed by design which is followed by development and implementation and that everything should culminate in an evaluation of the learning One of the many struggles faced however is that most instructional design systems do not make a clear connection between these phases While there are many valid models and concepts when phases are treated as separate entities it tends to increase the amount of time and energy needed to successfully complete each In turn these misunderstandings lead many training and learning professionals

to focus on aspects that are less valuable in developing effective training programs Today's training and learning professionals often desire for programs to be created quickly which often leads to designers skipping important steps in developing an effective program Many have asked if this better more efficient way exists The answer is the DACUM System DACUM standing for Develop A Curriculum was developed in 1968 by Robert E Adams and has been successfully implemented by organizations world wide The DACUM System has experienced much success over the years because unlike other instructional design systems DACUM connects all the phases Not only does the DACUM System connect all phases of instructional design but it also can be done effectively in significantly less time than traditional instructional design This book specifically focuses on the program curriculum designer's role often referred to as a coordinator within the DACUM system and outlines everything one would need to build an effective DACUM learning program Throughout this book we include specific models illustrations and examples designed to walk potential program designers through the DACUM curriculum design process in greater detail than has ever been provided before Also within the book are strategies and techniques for effectively completing program development grids orienting curriculum committees to the DACUM process creating learning activities designing printed and A/V materials organizing Learning Activity Batteries selecting human resources implementing learning evaluating learning program refinement and managing the DACUM learning program
