Backdoor Add-ons. A new way to harbor the data Hemant Kumar Saini,2014-11-06 Document from the year 2014 in the subject Computer Science IT Security grade 1 language English abstract Today in the growing era of communication everyone wants to update with the new functionality so that they would survive with the best Since the only way to access Internet is the browser so it is vital to configure them securely With the growing demands to ease the work in one click many engine tools supportive plug ins have been developed for web browser And the users also without knowing its causes quickly installed such extensible plug ins in their browsers which gives the chances to intruders to get control their computer without their knowledge Such plug ins becomes victim for the vulnerabilities of the computer which are due to the manufacturer coding fault *Shattering Inequities* Robin Avelar La Salle,Ruth S. Johnson,2018-12-14 For education leaders who believe that all students deserve the premium education that only some currently experience *Shattering Inequities Real World Wisdom for School and District Leaders* shows how your leadership can provide equitable outcomes for our most vulnerable students Chapters include examples of actual equity leaders and leadership lessons as easily retrievable equity hooks memory cues of complete complex and nuanced leadership takeaways In the throes of educational transformation the book s examples provide leaders with practical ways to quickly and effectively infuse substantive thoughtfulness into common equity challenges and inspire equity driven action to ensure that demographics do not determine destiny An excellent guide for teachers administrators or anyone who wants to turn good intentions into reality for the children they serve

**Understanding Cyber Conflict** George Perkovich,Ariel E. Levite,2017-11-01 Cyber weapons and the possibility of cyber conflict including interference in foreign political campaigns industrial sabotage attacks on infrastructure and combined military campaigns require policymakers scholars and citizens to rethink twenty first century warfare Yet because cyber capabilities are so new and continually developing there is little agreement about how they will be deployed how effective they can be and how they can be managed Written by leading scholars the fourteen case studies in this volume will help policymakers scholars and students make sense of contemporary cyber conflict through historical analogies to past military technological problems The chapters are divided into three groups The first What Are Cyber Weapons Like examines the characteristics of cyber capabilities and how their use for intelligence gathering signaling and precision striking compares with earlier technologies for such missions The second section What Might Cyber Wars Be Like explores how lessons from several wars since the early nineteenth century including the World Wars could apply or not to cyber conflict in the twenty first century The final section What Is Preventing and or Managing Cyber Conflict Like offers lessons from past cases of managing threatening actors and technologies **Congressional Record** United States. Congress, The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded

in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873      Railfan & Railroad ,2003      Dr. Dobb's Journal ,2006      **The Magazine Antiques** ,1979      **BNA's Employee Relations Weekly** ,1989      **Backdoor Attacks against Learning-Based Algorithms** Shaofeng Li,Haojin Zhu,Wen Wu,Xuemin (Sherman) Shen,2024-05-12 This book introduces a new type of data poisoning attack dubbed backdoor attack In backdoor attacks an attacker can train the model with poisoned data to obtain a model that performs well on a normal input but behaves wrongly with crafted triggers Backdoor attacks can occur in many scenarios where the training process is not entirely controlled such as using third party datasets third party platforms for training or directly calling models provided by third parties Due to the enormous threat that backdoor attacks pose to model supply chain security they have received widespread attention from academia and industry This book focuses on exploiting backdoor attacks in the three types of DNN applications which are image classification natural language processing and federated learning Based on the observation that DNN models are vulnerable to small perturbations this book demonstrates that steganography and regularization can be adopted to enhance the invisibility of backdoor triggers Based on image similarity measurement this book presents two metrics to quantitatively measure the invisibility of backdoor triggers The invisible trigger design scheme introduced in this book achieves a balance between the invisibility and the effectiveness of backdoor attacks In the natural language processing domain it is difficult to design and insert a general backdoor in a manner imperceptible to humans Any corruption to the textual data e g misspelled words or randomly inserted trigger words sentences must retain context awareness and readability to human inspectors This book introduces two novel hidden backdoor attacks targeting three major natural language processing tasks including toxic comment detection neural machine translation and question answering depending on whether the targeted NLP platform accepts raw Unicode characters The emerged distributed training framework i e federated learning has advantages in preserving users privacy It has been widely used in electronic medical applications however it also faced threats derived from backdoor attacks This book presents a novel backdoor detection framework in FL based e Health systems We hope this book can provide insightful lights on understanding the backdoor attacks in different types of learning based algorithms including computer vision natural language processing and federated learning The systematic principle in this book also offers valuable guidance on the defense of backdoor attacks against future learning based algorithms
