Rethinking the Good Larry S. Temkin,2014-12-04 In choosing between moral alternatives choosing between various forms of ethical action we typically make calculations of the following kind using the principle of transitivity A is better than B B is better than C therefore A is better than C Larry Temkin shows is that if we want to continue making plausible judgments we cannot continue to make these assumptions **Vagueness in Context** Stewart Shapiro,2006-01-05 Stewart Shapiro s aim in Vagueness in Context is to develop both a philosophical and a formal model theoretic account of the meaning function and logic of vague terms in an idealized version of a natural language like English It is a commonplace that the extensions of vague terms vary with such contextual factors as the comparison class and paradigm cases A person can be tall with respect to male accountants and not tall even short with respect to professional basketball players The main feature of Shapiro s account is that the extensions and anti extensions of vague terms also vary in the course of a conversation even after the external contextual features such as the comparison class are fixed A central thesis is that in some cases a competent speaker of the language can go either way in the borderline area of a vague predicate without sinning against the meaning of the words and the non linguistic facts Shapiro calls this open texture borrowing the term from Friedrich Waismann The formal model theory has a similar structure to the supervaluationist approach employing the notion of a sharpening of a base interpretation In line with the philosophical account however the notion of super truth does not play a central role in the development of validity The ultimate goal of the technical aspects of the work is to delimit a plausible notion of logical consequence and to explore what happens with the sorites paradox Later chapters deal with what passes for higher order vagueness vagueness in the notions of determinacy and borderline and with vague singular terms or objects In each case the philosophical picture is developed by extending and modifying the original account This is followed with modifications to the model theory and the central meta theorems As Shapiro sees it vagueness is a linguistic phenomenon due to the kinds of languages that humans speak But vagueness is also due to the world we find ourselves in as we try to communicate features of it to each other Vagueness is also due to the kinds of beings we are There is no need to blame the phenomenon on any one of those aspects **On Reference** Andrea Bianchi,2015 What exactly is reference And how can we characterize the semantic properties involved Eighteen leading experts address the problems and debates that have arisen from these questions over the last century They contribute to our understanding of the nature of reference its role in cognition and the place it should be given in semantic theory Lumber Manufacturer and Dealer ,1911 *Parker's Choice Selections, No. 1* C.
