Posture and Locomotion, 1988-10-01 This volume publishes the review articles presented by the invited speakers at the

Satellite Meeting to the Barany Society Meeting held in Bologna Italy during June 1987 The subject matter in this book is

divided into seven main sections The first three present basic neuroanatomical and neurophysiological aspects of

vestibulospinal reflexes and document the neck afferent and visual influences on these reflexes The following sections deal

with the control of locomotion posture and eye head trunk coordination by vestibulospinal signals The final section provides

current knowledge on the processes underlying compensation of vestibulospinal deficits An overall review precedes each

main section so that the reader is informed as to which questions are still controversial and require further investigation In

this way a basis is provided for those needing a current account of the field of vestibulospinal reflexes Due to the extensive
