**Keys of Gnosis**

Robert Bolton,2005-03 For a long time now religion in the West has been polarized between a democratic kind of faith meant for simple believers and divine mysteries so high that hardly anyone can claim to know much about them The vital connecting link between them that of metaphysical religion is all but lost From the Introduction There are many books that seek to answer the fundamental questions of life Who am I Does life have a purpose How should I live Dr Bolton s book brings to these universal questions an extraordinary degree of metaphysical insight It contains in highly condensed form a veritable library of traditional wisdom offering a systematic reconstruction of our understanding of the soul and its relation to archetypal reality Its starting point is the fact that increasing numbers of people seem to lack spiritual and material power over their own lives Modern man feels like a victim But true power real freedom is closer than we think Our mistake lies in accepting a false view of the self and neglecting the metaphysical dimension that gives access to eternity Dr Bolton s book offers a crash course in liberation It can liberate us specifically from a common sense idea of reality which is profoundly false and which holds us in unconscious slavery to time and appearances The book defends the capacity of the human mind to obtain objective insight despite the obfuscations of postmodernism and represents a bold development of the Platonist tradition associated with St Augustine Plotinus and Proclus This book is like a diamond a diamond placed not in a necklace but at the business end of a drill It is up to us to use the drill to penetrate reality Writing the book was a great achievement Reading it invites us to make the achievement our own Stratford Caldecott G K Chesterton Institute for Faith Culture

are expressed in dedicated free standing instruments or incorporated as side constraints or collaterally in larger multi functional instruments In this light does it make sense to view a trade centred community such as the EU as a prospective regional model for human rights The second part of the book debates the coherence of a global order committed to respect for human rights and human dignity as one of its founding principles If globalisation aspires to export and spread respect for human rights the thrust of the papers in this volume is that it could do better that legitimate global governance demands that it does a great deal better and that lawyers face a considerable challenge in developing a coherent jurisprudence of fundamental values as the basis for a just global order     De arte ,2002     *Love Letters from the Seminary* Enrico D.
