Violence at the Urban Margins Javier Auyero, Philippe Bourgois, Nancy Scheper-Hughes, 2015-03-09 In the Americas the middle and upper middle classes and their concerns dominate debates around public safety However even a cursory count of the victims reveals that the people suffering the most from violence live and die at the margins of urban societies While those at the low end of the social order live in danger the discourse about violence and risk belongs to more advantaged others prone to view violence as evidence of a cultural or racial defect rather than see a relationship to economic and political marginalization As a result the experience of interpersonal violence among the urban poor is constantly muted and denied This volume of essays brings forth the everyday fear and trauma of living in relegated territories It features cutting edge ethnographic research on the role of violence in the lives of the urban poor in South Central and North America and sheds light on the suffering that violence produces and perpetuates as well as the individual and collective responses that violence generates among those living at the urban margins

incivilities and urban harm on the other Progressive urbanisation not only influences people's living conditions their well being and health but may also generate social conflict and consequently fuel disorder and crime Rooted in interdisciplinary scholarship this book considers a range of urban issues focussing specifically on their sensory emotive power and structural dimensions The visual audio and olfactory components that offend or harm are inspected including how urban social control agencies respond to violations of imposed sensory regimes Emotive dimensions examined include the consideration of people emotions and sensibilities in the perception of incivilities in the shaping of social control to deviant phenomena and their role in activating or suppressing people's resistance towards otherwise harmful everyday practices Power and structural dimensions examine the agents who decide and define what anti social and harmful is and the wider socio economic and cultural setting in which urbanites and social control agents operate Connecting with sensory and affective turns in other disciplines the book offers an original distinctive and nuanced approach to understanding the harms disorder and social control in the city An accessible and compelling read this book will appeal to those engaged with criminology sociology human geography psychology urban studies socio legal studies and all those interested in the relationship between urban space and urban harm

Disorder and Decline Wesley G. Skogan, 1990 This book describes the impact of factors ranging from noisy neighbors accumulating trash and vagrancy to public gambling prostitution and drug sales on neighborhood stability and argues that these types of disorder contribute significantly to urban decline The discussion uses data from surveys conducted between 1977 and 1983 in Atlanta Chicago Houston Newark N J Philadelphia and San Francisco to explore the links among disorder fear and crime noting that many aspects of disorder cannot be effectively policed because they are not covered by criminal laws Nevertheless a close connection exists between residents' perceptions of disorder and the spiral of community decline In addition acceptance of rising levels of disorder undermines the social ties on which neighborhood stability depends As a result criminals start to exploit the declining social control and the level of safety and order continue to decline The discussion concludes that reversing the trend is possible and suggests ways in which urban authorities and community residents could work together to confront disorder effectively

Crime and Disorder in Community Context Rebecca Wickes, Lorraine Mazerolle, 2021 Community dynamics shape the way communities function Areas that suffer from high levels of crime and disorder often experience decreased social capital declining property values slow economic development and high levels of fear of victimization among residents Changing the dynamics that foster crime problems across urban communities is a challenge for policy makers police residents and local stakeholders Drawing on unique longitudinal data at the community level *Crime and Disorder in Community Context* entwines current ecological theories of crime with key debates on the relevance of community in contemporary urban life to examine the spatial and temporal relationships between community structure community social capital informal social control and the occurrence of crime and disorder
