

Critical Care NURSING Practice Guide

A Roadmap for Students and New Graduates

The purpose of this book is to provide a step-by-step practical guide that will help new graduates and nursing students assigned to critical care areas, provide optimal care to their patients with confidence. It will help inexperienced nurses to systematically assess their patients, plan individualized care, implement therapeutic modalities with competence, collaborate effectively and evaluate the effectiveness of nursing actions. How and what to document for prudent practice is also included in this book. In addition, there is a chapter to motivate readers to excel in their areas, engage in lifelong learning, and establish their confidence and competency with confidence. In essence, it will be a road map for a nurse to become an expert in daily routines and emergencies in the critical care area. This is a unique approach, and such practical approaches are not given in textbooks. It is designed to be read as if you are having directions from an experienced preceptor in the unit.
