A chapter on explaining puzzles, and the last part of the book provides introductions to a number of additional current topics in asset pricing research, including rare disasters, long run risks, external and internal habits, asymmetric and incomplete information, heterogeneous beliefs, and non expected utility preferences. Each chapter includes a Notes and References section providing additional pathways to the literature. Each chapter also includes extensive exercises.

Asset Pricing and Portfolio Choice Theory Kerry Back, 2010-09-10 This book covers the classical results on single period discrete time and continuous time models of portfolio choice and asset pricing. It also treats asymmetric information, production models, various proposed explanations for the equity premium puzzle, and topics important for behavioral finance.

Choice Theory Kerry Back, 2017 Today all would agree that Mexico and the United States have never been closer than the fates of the two republics are intertwined. Mexico has become an intimate part of life in almost every community in the United States through immigration, imported produce, business ties, or illegal drugs. It is less a neighbor than a sibling, no matter what our differences; it is intricately a part of our existence. In the fully updated second edition of *Mexico What Everyone Needs to Know*, Roderic Ai Camp gives readers the most essential information about our sister republic. To the south, Camp organizes chapters around major themes: security and violence, economic development, foreign relations, the colonial heritage, and more. He asks questions that take us beyond the headlines: Why does Mexico have so much drug violence? What was the impact of the North American Free Trade Agreement? How democratic is Mexico? Who were Benito Juarez and Pancho Villa? What is the PRI, the Institutional Revolutionary Party? The answers are sometimes surprising. Despite ratification of NAFTA, for example, Mexico has fallen behind Brazil and Chile in economic growth, and rates of poverty. Camp explains that lack of labor flexibility, along with low levels of transparency and high levels of corruption, make Mexico less competitive than some other Latin American countries. The drug trade, of course, enhances corruption and feeds on poverty: approximately 450,000 Mexicans now work in this sector. Brisk, clear, and informed, *Mexico What Everyone Needs To Know* is

offers a valuable primer for anyone interested in the past present and future of our neighbor to the South Links to video interviews with prominent Mexicans appear throughout the text The videos can be accessed at through The Oxford Research Encyclopedia of Latin American History at <http://latinamericanhistory.oxfordre.com/page/videos> Solutions Manual
