The Use of a Balance Equation Model in the Numerical Weather Prediction Samuel Y. K. Yee,1975 The finite difference solution to a balance equation model is discussed in terms of the solution to a coupled linear elliptic system with variable coefficients both in space and time By suitably arranging the unknowns in their finite difference analogs this coupled system is in fact no more than just one large linear algebraic system Thus for a two level model the problem of solving a system of four coupled equations becomes that of solving a single algebraic system of 4JK unknowns
