US Intelligence and Al Qaeda Peter de Werd, 2020-09-21 This book sets out a new analytic methodology analysis by contrasting narratives ACN which states that defining an enemy and attempting to counter threats can contribute to the manifestation of that threat Peter de Werd applies ACN to the problem the US faced in understanding and responding to the phenomenon of Al Qaeda in the 1990s He demonstrates how this approach can fill a gap in intelligence studies by enhancing the understanding of complex intelligence problems and strengthening the practice of intelligence analysis Adopting a reflexivist theoretical stance the book underlines the importance of an integrated approach to interpretation and action and of a continuous dialogue between intelligence and policy

Surveillance, Privacy and Security Michael Friedewald, J. Peter Burgess, Johann Čas, Rocco Bellanova, Walter Peissl, 2017-03-16 This volume examines the relationship between privacy surveillance and security and the alleged privacy security trade off focusing on the citizen s perspective Recent revelations of mass surveillance programmes clearly demonstrate the ever increasing capabilities of surveillance technologies The lack of serious reactions to these activities shows that the political will to implement them appears to be an unbroken trend The resulting move into a surveillance society is however contested for many reasons Are the resulting infringements of privacy and other human rights compatible

with democratic societies Is security necessarily depending on surveillance Are there alternative ways to frame security Is it possible to gain in security by giving up civil liberties or is it even necessary to do so and do citizens adopt this trade off This volume contributes to a better and deeper understanding of the relation between privacy surveillance and security comprising in depth investigations and studies of the common narrative that more security can only come at the expense of sacrifice of privacy The book combines theoretical research with a wide range of empirical studies focusing on the citizen s perspective It presents empirical research exploring factors and criteria relevant for the assessment of surveillance technologies The book also deals with the governance of surveillance technologies New approaches and instruments for the regulation of security technologies and measures are presented and recommendations for security policies in line with ethics and fundamental rights are discussed This book will be of much interest to students of surveillance studies critical security studies intelligence studies EU politics and IR in general A PDF version of this book is available for free in open access via www.tandfebooks.com It has been made available under a Creative Commons Attribution Non Commercial 3.0 license

Crypto-Politics Linda Monsees, 2019-07-19 This book examines current debates about the politics of technology and the future of democratic practices in the digital era The volume centres on the debates on digital encryption in Germany and the USA during the aftermath of Edward Snowden s leaks which revolved around the value of privacy and the legitimacy of surveillance practices Using a discourse analysis of mass media and specialist debates it shows how these are closely interlinked with technological controversies and how as a result contestation emerges not within one public sphere but within multiple expert circles The book develops the notion of publicness in order to grasp the political significance of these controversies thereby making an innovative contribution to Critical Security Studies by introducing digital encryption as an important site for understanding the broader debates on cyber security and surveillance This book will be of much interest to students of critical security studies science and technology studies and International Relations

Conflict Resolution and Ontological Security Bahar Rumelili, 2014-12-17 This volume highlights the ways in which the prospect of peace can generate anxieties and consequently set in motion social and political processes that reproduce and reactivate conflicts In analysing this issue the volume builds on the notion of ontological security and its recent applications to international relations theory Although conflicts threaten the physical security of the parties involved they also help settle existential questions about basic parameters of life being and identity and thus over time become sources of ontological security The prospect of peace through the resolution or transformation of conflict threatens to unsettle the stability and consistency of self narratives and their associated routines and habits at the individual group and state levels The contributors argue two key points 1 that ontological insecurity may set in motion political and social processes that reproduce and reactivate conflicts 2 that coping with peace anxieties necessitates the formulation of alternative self narratives at the individual societal and state levels that re situate the Self in relation to Other and to the world at large Consequently the book analyses

the ways in which and the conditions under which conflict resolution induces ontological insecurity and the different ways in which ontological insecurity has prevented the successful culmination of peace processes in different conflict contexts including Cyprus Israel Palestine and Northern Ireland This book will be of much interest to students of critical security studies conflict resolution peace and conflict studies social theory and IR in general China's Soft War on Terror Tianyang Liu, 2021-11-29 This book explores how the Chinese government reasserts its control and management of public spaces as part of its overall counter terrorism strategy The work focuses primarily on the banal and alternative forms that China's war on terror takes the everyday non military socio economic and spatio material It presents three different cases of control associated with the state's effort to manage material social and digital public spaces as remedies to terrorism and ethnic unrest in China the redevelopment project of Kashgar the home of Uyghur culture from 2001 to 2017 the forging of local partnerships with potential agents i.e. the local cadres and imams in Xinjiang as part of the process of implementing counter terrorism policies and an online campaign about international terrorism that appeared on Sina Weibo Using securitization theory as a theoretical framework the book establishes links between human geography and critical security studies and advances the understanding of non confrontational forms of resistance in China It also focuses attention on the binary relationship between the securitizing agency of the state and the counter securitization agency of terrorists while also exploring the manner in which other societal forces interact with these processes This book will be of interest to students of critical terrorism studies Chinese studies human geography and security studies *PRIO New Security Studies*, 2012

Strategies in Conflict York University (Toronto, Ont.). Centre for International and Strategic Studies, 1995 **Critical Security Methods** Claudia Aradau, Jef Huysmans, Andrew Neal, Nadine Voelkner, 2014-08-13 Critical Security Methods offers a new approach to research methods in critical security studies It argues that methods are not simply tools to bridge the gap between security theory and security practice Rather to practise methods critically means engaging in a more free and experimental interplay between theory methods and practice This recognises that the security practices we research are often methods in their own right as forms of surveillance data mining visualisation and so on and that our own research methods are themselves practices that intervene and interfere in those sites of security and insecurity Against the familiar methodological language of rigour detachment and procedural consistency Critical Security Methods reclaims the idea of method as experiment The chapters offer a series of methodological experimentations that assemble concepts theory and empirical cases into new frameworks for critical security research They show how critical engagement and methodological innovation can be practiced as interventions into diverse instances of insecurity and securitisation including airports drug trafficking peasant struggles biometrics and police kettling The book will be a valuable resource for students and researchers in critical security studies politics and international relations *Routledge critical security studies series*, 2012 **Critical security studies**, 19?? **Handbook of Security Studies**, 2009 **Assessing Information Security** Andrew
